NEW QUESTION: 114

Which two Unity features are used to protect data from ransomware attacks? (Choose two.)

- A. Snapshots and Replication
- B. Snapshots and Deduplication
- C. Snapshots and Compression
- D. Snapshots and Encryption

Answer: D (LEAVE A REPLY)

Which two Unity features are used to protect data from ransomware attacks? (Choose two.)

EMC Unity uses snapshots and encryption to protect data from ransomware attacks. Snapshots are used to create a point-in-time copy of the data, and encryption is used to protect the data from unauthorized access. UnityVSA also uses snapshots and encryption to protect data from ransomware attacks.

NEW QUESTION: 115

Which two Unity features are used to protect data from ransomware attacks? (Choose two.)

Unity uses snapshots and encryption to protect data from ransomware attacks.

Which two Unity features are used to protect data from ransomware attacks? (Choose two.)
