NEW QUESTION: 6

Which HPE storage solution is best suited for a VDI environment with 1000 users and 1000 VMs? The environment uses ESXi and has 12Gbps SAS controllers. The storage is located in a remote location.

- A. HPE Alletra 9060
- B. HPE StoreOnce AF20
- C. HPE MSA 2062
- D. HPE Alletra 6030

Answer: (SHOW ANSWER)

HPE MSA 2062 is the best choice for this VDI environment. It is a mid-range storage solution that supports 12Gbps SAS controllers and offers high performance with up to 325,000 IOPS. It also includes features like HPE OneView and HPE StoreOnce for backup and recovery. The other options are either not designed for VDI or do not support 12Gbps SAS controllers.

NEW QUESTION: 7

Which HPE storage solution is best suited for a 500-user VDI environment with 1000 VMs? The environment uses ESXi and has 12Gbps SAS controllers. The storage is located in a remote location.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 8

Which HPE server is best suited for a VDI environment with 1000 users and 1000 VMs? The environment uses ESXi and has 12Gbps SAS controllers. The server is located in a remote location.

- A. HPE Apollo 6500 Gen10
- B. HPE ProLiant DL380 Den10
- C. HPE Edgeline 8000
- D. HPE ProLiant DL380 Gen10 Plus

Answer: C (LEAVE A REPLY)

HPE Edgeline 8000 is the best choice for this VDI environment. It is a high-performance server designed for VDI workloads and supports 12Gbps SAS controllers. It also includes features like HPE OneView and HPE StoreOnce for backup and recovery.

8000 Intel Xeon processors, 16 cores, 1.5TB memory, 48TB storage. HPE Edgeline 8000 supports GPU or FPGA acceleration. HPE Edgeline 8000 -10°C ~ 55°C, ASHRAE Class4.

NEW QUESTION: 9

HPE GreenLake Data Protection is used for which of the following? (Select two.)

- A. Microsoft Azure
- B. AWS S3
- C. Azure Blob Storage
- D. CSI storage
- E. Amazon S3

Answer: B,C (LEAVE A REPLY)

HPE GreenLake Data Protection is used for which of the following? (Select two.) HPE GreenLake Data Protection is used for AWS S3 and Azure Blob Storage. It is not used for CSI storage or Amazon S3.

HPE GreenLake Data Protection is used for which of the following? (Select two.)

Answer: B,C: HPE GreenLake Data Protection is used for AWS S3 and Azure Blob Storage. It is not used for CSI storage or Amazon S3. DRaaS is a service that provides disaster recovery as a service. DRaaS is used for disaster recovery. DRaaS is not used for backup and recovery. DRaaS is used for disaster recovery. DRaaS is not used for backup and recovery. DRaaS is used for disaster recovery. DRaaS is not used for backup and recovery.

Azure Blob Storage: HPE GreenLake Data Protection is used for Azure Blob Storage. It is not used for AWS S3 or Amazon S3. Azure Blob Storage is a cloud storage service. Azure Blob Storage is used for storing data in the cloud. Azure Blob Storage is not used for backup and recovery. Azure Blob Storage is used for storing data in the cloud. Azure Blob Storage is not used for backup and recovery.

Azure Blob Storage is used for storing data in the cloud. Azure Blob Storage is not used for backup and recovery. Azure Blob Storage is used for storing data in the cloud. Azure Blob Storage is not used for backup and recovery.

NEW QUESTION: 10

Which of the following is a VMware storage solution? (Select one.) HPE Nimble is a VMware storage solution. HPE Alletra is a VMware storage solution. HPE MSA is a VMware storage solution. HPE Nimble is a VMware storage solution.

- A. HPE Nimble
- B. HPE Alletra
- C. HPE MSA
- D. HPE Nimble

Answer: A (LEAVE A REPLY)

HPE SimpliVity is a hyperconverged infrastructure (HCI) solution that integrates compute, storage, and networking into a single software-defined layer. It is designed to simplify IT operations and reduce costs.

HPE SimpliVity integrates with VMware vSphere and vCenter, allowing for seamless management of VMware environments. It supports features like vMotion, HA, DRS, and SRM2 for high availability and disaster recovery.

HPE SimpliVity offers a unified architecture that simplifies the stack, reducing the number of components and the time to deploy. It is built on a software-defined storage (SDS) foundation.

HPE SimpliVity provides a consistent user experience across different environments, making it easy to manage and scale. It is designed to be a single point of contact for all IT needs.

HPE Nimble is a cloud-native storage solution that offers high performance and scalability. It is designed to be a single point of contact for all IT needs, including storage, backup, and recovery.

HPE Alletra is a cloud-native storage solution that offers high performance and scalability. It is designed to be a single point of contact for all IT needs, including storage, backup, and recovery.

HPE MSA is a mid-range storage solution that offers high performance and scalability. It is designed to be a single point of contact for all IT needs, including storage, backup, and recovery.

1: HPE SimpliVity 2: VMware vSphere 3: HPE Nimble Storage 4: HPE Alletra: [HPE MSA]

NEW QUESTION: 11

CloudPhysics is a cloud-native storage solution that offers high performance and scalability. It is designed to be a single point of contact for all IT needs.

A. CloudPhysics is a cloud-native storage solution that offers high performance and scalability. It is designed to be a single point of contact for all IT needs.

B. CloudPhysics is a cloud-native storage solution that offers high performance and scalability. It is designed to be a single point of contact for all IT needs.

C. CloudPhysics is a cloud-native storage solution that offers high performance and scalability. It is designed to be a single point of contact for all IT needs.

D. CloudPhysics is a cloud-native storage solution that offers high performance and scalability. It is designed to be a single point of contact for all IT needs.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 12

CloudPhysics is a cloud-native storage solution that offers high performance and scalability. It is designed to be a single point of contact for all IT needs.

A. CloudPhysics is a cloud-native storage solution that offers high performance and scalability. It is designed to be a single point of contact for all IT needs.

B. CloudPhysics is a cloud-native storage solution that offers high performance and scalability. It is designed to be a single point of contact for all IT needs.

C. CloudPhysics is a cloud-native storage solution that offers high performance and scalability. It is designed to be a single point of contact for all IT needs.

D. CloudPhysics is a cloud-native storage solution that offers high performance and scalability. It is designed to be a single point of contact for all IT needs.
