- D. □□□ □□□

Answer: B (LEAVE A REPLY)

This method is specifically designed for situations where the auditor can stop the sampling process as soon as a predetermined number of errors are found. It can be more efficient when expecting few errors, allowing the auditor to terminate the sampling once a certain level of confidence is reached regarding the error rate in the population.

Answer: B ([LEAVE A REPLY](#))

The exit interview, conducted at the end of the audit, provides an IS auditor with the opportunity to discuss findings and recommendations with the auditee management. During the exit interview, an IS auditor should:

- Ensure that the facts presented in the report are correct and material.

- Ensure that the recommendations are realistic and cost-effective and, if not, seek alternatives through negotiation with auditee management.
- Recommend implementation dates for agreed-on recommendations.

Answer: D ([LEAVE A REPLY](#))

An IS auditor reviewing a network printer disposal process should be most concerned with the evidence available to verify that the hard drives of the printers have been sanitized prior to disposal. The hard drives of network printers may contain sensitive and confidential information, such as confidential documents, user credentials, or network configurations. If this information is not properly sanitized prior to disposal, it could be accessed by unauthorized individuals and potentially used for malicious purposes.

Answer: C (LEAVE A REPLY)

These metrics provide valuable information on how resources, such as CPU, memory, and storage, are being used and can help identify bottlenecks or underutilized resources. This information can then be used to optimize resource usage, such as by adding more memory or upgrading hardware, which can improve overall performance.
