Answer: C ([LEAVE A REPLY](#))

/.

NEW QUESTION: 4

Which of the following phases in the fundamental test process is considered to deliver a document which can be used as a major input for test process improvement?

A. Test planning and control

B. Test implementation & execution

C. Evaluating exit criteria and reporting

D. Test project closure

Answer: ([SHOW ANSWER](#))

Explanation/Reference:

Testlet 1

A software house is concerned about the number of defects found in software released to its customers.

They are starting to plan a new software product. In the past, releases have often been stopped due to poor planning and too many defects found during high level testing. You have been recruited to the newly created position of test manager and asked to develop a test strategy, manage the testing of the project and organize the resources needed to carry out the testing.

NEW QUESTION: 5

NEW QUESTION: 8

The flow graph below shows the logic of a program for which 100% statement coverage and 100% decision coverage is required on exit from component testing.

The following test cases have been run:

- Test Case 1 covering path P,Q,R,U
- Test Case 2 covering path P,Q,S,V
- Test Case 3 covering path P,Q,S,W,X
- Test case 4 covering path P,Q,S,W,Y

Refer to the exhibit

- A. Statement coverage and decision coverage are both less than 100%
- B. Statement coverage is 100%; decision coverage is less than 100%
- C. Statement coverage is less than 100%; decision coverage is 100%.
- D. Statement coverage is 100%; decision coverage is 100%

Answer: A ([LEAVE A REPLY](#))

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 25

Which is not a major task of test implementation and execution?

- A. Logging the outcome of test execution and recording the identities and versions of the software under test, test tools and testware.
- B. Verifying that the test environment has been set up correctly.
- C. Checking test logs against the exit criteria specified in test planning.

D. Develop and prioritizing test cases, creating test data, writing test procedures and optionally, preparing test harness and writing automated test scripts.

Answer: (SHOW ANSWER)

NEW QUESTION: 26

Which of the following would you expect to see in the master test plan?

A. The test approach that will be applied at system integration testing.

B. A detailed identification of the resources that will carry out structural testing in the first iteration.

C. A description of how the test cases are cross-referenced to requirements in the test management tool.

D. A list of the names of the testers who will carry out the performance testing for the final iteration.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 27

Select THREE issues from the options provided that should at least be raised. 1 credit

A. Which project will be selected to perform the tool pilot?

B. What are the problems we are trying to address?

C. How will the change process be managed?

D. Is customized training available?

E. How will the implementation be organized?

F. Do we have a set of tool requirements to validate the tool against?

G. Has there been sufficient comparison of tools?

Answer: B,F,G (LEAVE A REPLY)

NEW QUESTION: 28

What factors should be considered to determine whether enough testing has been performed?

(i)The exit criteria.

(ii)The budget.

(iii)How big the test team is.

(iv)The product's risk profile.

(v)How good the testing tools are.

(vi)Sufficient details of the system status to allow decisions

A. i and ii and v and vi

B. i and ii and iv and vi

C. ii and iii and iv and v

D. i and ii and iii and vi

Answer: (SHOW ANSWER)

NEW QUESTION: 29

Which of the following is a consideration when deploying test execution tools?

- A. Keyword-driven testing cannot be used with test execution tools
- B. Expected results for tests are not required because the tool generates expected results
- C. Data-driven testing cannot be used with test execution tools
- D. Recorded manual tests may become unstable in use

Answer: D (LEAVE A REPLY)

NEW QUESTION: 55

"□□□ □□ □□□□ □□□□□?"

XYZ is a Swedish company and the company language is local and all system development documentation is done in the local language.

As a test manager you are currently leading an independent test team of 4 people to system test the payroll functionality. The 4 members of staff are described below:

-John is one of the senior testers. He has been working for the company the longest and has a good network of contacts. He is confident and tries to bring other team members together to promote team discussions. He is sometimes considered to be manipulative and is often seen to delegate personal work.

-Sue is a senior tester. She always seems to be busy and often seems to have too much work to do. However, she gets her work done, regardless of what it takes. She is often inclined to worry unduly and sometimes considered to be argumentative and blunt. She is conscientious and searches out errors and omissions. She always delivers on time.

-Steve is a tester. He is serious minded and often looks ahead. When he is given problems to solve he often looks at all options before deciding. He needs to be a little bit more diplomatic though in his approach to other people because his attitude often has a negative affect when trying to inspire others. He is good person discuss ideas with. Steve used to work as a business analyst on the payroll department.

-Vicki is a test analyst. She is the newest member of the team and has been employed for her automation skills. Vicki is shown to be dedicated to automation, having spent the past 5 years developing the necessary skills in automation tools. Her view on testing seems too limited; she believes automation is the only way forward.

Both John and Sue are highly experienced at finding defects based on their experience with the system and domain knowledge.

NEW QUESTION: 89

An iPhone application identifies and counts all purchases of a particular product from a shopping website.

The application incorrectly counts purchase attempts by including both failed attempts, and also those where the purchase was terminated by the user before completion. Testing has identified that the problem was located in the 'purchase identification' module, where the

first stage in the purchasing process was counted, rather than a successful confirmed purchase.

Which of the following statements correctly identifies what has happened?

- A. A bug in the purchase identification module caused a fault in the application
- B. The application failed because of a defect in the purchase identification module caused by a programmer mistake or an error in the specification.
- C. A defect in the purchase identification module caused by a mistake in the module specification led to a defect in the overall application
- D. An error by the programmer led to a mistake in the purchase identification module and this caused a defect in the application

NEW QUESTION: 206

Which option BEST describes how the level of risk is determined?

- A. The likelihood of an adverse event happening multiplied by the cost of preventing it
- B. The impact of an adverse event multiplied by the likelihood of that event occurring
- C. The consequences of a potential problem multiplied by the cost of possible legal action
- D. The likelihood and the probability of a hazard occurring

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 207

Which of the following defects is most likely to be found by a test harness?

- A. Variance from programming standards.
- B. A defect in middleware.
- C. Memory leaks.
- D. Regression defects.

Answer: ([SHOW ANSWER](#))

Variance from programming standards defects (option (A)) are found during the review or static testing process. Therefore a test harness is unlikely to find a defect in programming standards.

Memory leak defects (option (C)) could potentially be found by a test harness designed to run many test cases.

Regression defects (option (D)) could be found using many types of test tool.

Defects in middleware (option (B)) are generally more likely to be found by a test harness or a dynamic analysis tool than by any other type of tool.

NEW QUESTION: 209

Comparing TMMi and TPI, which is not a valid reason for choosing either TPI or TMMi? 2 credits

- A. If the scope of test performance improvement covers all test levels, TMMi is preferred since TPI focusses mainly on black-box testing.
- B. If the organization is already applying CMMI, TMMi may be preferred since it has the same structure and uses the same terminology. TMMi addresses management commitment very strongly and is therefore more suitable to support a top-down improvement process.
- C. TMMi can only be used with the traditional V model, whereas TPI can be used with all types of software life cycles.
- D. TPI is much more a bottom-up model that is suitable for addressing test topics for a specific (test) project.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 210

Which of the following would be the TWO most appropriate examples of entry criteria documented in the system integration test plan? 2 credits

- A. The percentage of decision coverage achieved during unit testing.
- B. The availability of the latest version of the capture-replay tool (for testing the interface with the newly developed test management tool).
- C. The sign-off of a performance test software release note (test item transmittal report) by both development and testing showing that system performance meets the specified acceptance criteria.
- D. The percentage of acceptance test procedures scheduled for execution.
- E. The percentage of requirements coverage achieved during system integration test.

- E. □□□ □□□

Answer: E ([LEAVE A REPLY](#))

NEW QUESTION: 239

Which of the following accurately defines the integration testing test level?

- A. Test basis includes use cases, test objects include user procedures and tests concentrate on a high level model of system behaviour
- B. Test basis includes business processes, test objects include system configuration and configuration data, and tests concentrate on establishing confidence in the system
- C. Test basis includes software and system design, test objects include interfaces, and tests concentrate on the interactions between different parts of a system
- D. Test basis includes component requirements, test objects include database modules, and tests concentrate on the behaviour of the system as a whole.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 243

What if the project isn't big enough to justify extensive testing..?

- A. Use risk based analysis to find out which areas need to be tested
- B. Use automation tool for testing
- C. Both a and b
- D. None of the above

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 244

A deviation from the specified or expected behavior that is visible to end-users is called:

- A. a failure
- B. an error
- C. a fault
- D. a defect

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 245

Which of the following is a valid drawback of independent testing? 1 credit

- A. Independent testers will become a bottleneck and introduce problems in incident management.
- B. Independent testers need extra education and always cost more.
- C. Developer and independent testing will overlap and waste resources.
- D. Developers loose the sense of responsibility and independent testers may become a bottleneck.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 246

Risks should be constantly reviewed. Given the current situation, which one of the following factors is most likely to lead to a revised view of product risk? 3 credits

- A. The method used for test estimation is not accurate enough and hence the money spent on testing exceeded its budget.
- B. The concerns over the user interface may lead to changes to the interface which cannot be implemented by development in time for the second test iteration.
- C. The delivery of the application without the interface changes may upset the user community.
- D. The concerns over the user interface raises the likelihood of a risk in that area and increases the amount of test effort needed for the user interface, thereby limiting the test effort available for other parts of the test management tool.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 247

Which of the following is most likely to cause failure in the implementation of a test tool?

- A. The cost of resources to implement and maintain the tool.
- B. The purchase price of the tool.
- C. Underestimating the demand for a tool.
- D. No agreed requirements for the tool.

- C. Missing Statements
- D. Unused Statement

Answer: C (LEAVE A REPLY)

NEW QUESTION: 251

Which of the following would you least expect to form part of the analysis of initial tool costs? 1 credit

- A. Integration with other tools
- B. Learning time required to use the new tool
- C. Tool portability
- D. Evaluation of suitable tools

Answer: C (LEAVE A REPLY)

Topic 4, Scenario 4, V1 "Test Management Tool"

A software development company that sells an established capture-replay tool has decided to complement it with a test management tool. The capture-replay tool was developed over a number of years and is used by a large number of clients.

The test management tool will be developed by the same team that developed the capture-replay tool, using the same technology. The company test strategy mandates that structural testing is focussed at the component test level and dynamic non-functional testing is focussed at the acceptance test level.

In response to growing customer demand, it is proposed to develop the test management tool in an incremental manner. Each increment will be developed using the V life cycle model. The target platform is a PC in a local area network. The PC uses a proprietary relational database and communicates with a single PC which acts as a server.

The test management tool must interface with the company's capture replay tool. Over the first 12 months of the development period the following functionality will be developed for the tool (in two increments): basic requirements management, support for test case creation; support for test procedures, test scripts and test suites. The functionality to be included in later increments will be driven by customer demand: however they expect to provide an incident management system, a web front-end, and interfaces to other proprietary tools and database management systems.

NEW QUESTION: 252

Which of the following is not decided in the test-planning phase..?

- A. Hardware and software
- B. Schedules and deliverables
- C. Types of test cases
- D. Entry and exit criteria

Answer: C (LEAVE A REPLY)

NEW QUESTION: 253

Which of the following is NOT a typical key challenge for testing in a RAD based development approach? 1 credit

- A. Project management and control
- B. Re-usable test scripts for (automated) regression testing
- C. Time-boxing
- D. No complete requirements specification

Answer: A (LEAVE A REPLY)

NEW QUESTION: 254

Which of the following characteristics is most likely to promote effective software testing?

- A. Confidence that the next stage will find defects missed at this stage
- B. A belief that programmers always make mistakes
- C. Knowledge of the number of defects typically found in a program
- D. Independence from the production process

Answer: D (LEAVE A REPLY)

NEW QUESTION: 255

?

- A.
- B.
- C.
- D.

Answer: C (LEAVE A REPLY)

Which aspect in the test estimate is the main risk in this project? 1 credit

- A. Quality of the specification
- B. Availability of end-users
- C. The costs of hardware and tools
- D. Unknown input quality due to third party development

Answer: D (LEAVE A REPLY)

Topic 8, Scenario 8, V2 "Test Proems Improvement"

You have raised the issue that improving the testing process is also dependent on the status of the software development process.

NEW QUESTION: 259

Which of the following team roles would be most appropriate to enhance the team and why? 2 credits

- A. A person with in-depth technical skills
- B. A person who brings new ideas to the team
- C. A person with the ability to complete tasks
- D. A quality assurance officer

Answer: B (LEAVE A REPLY)

NEW QUESTION: 261

Which from the following list are typically found to enable the review process to be successful? [K2]

- a. Each review has clear defined objectives
- b. The lower the number of defects, the better the review process
- c. The right people for the review objective are involved
- d. There is an emphasis on learning and process improvement
- e. Management are not involved in the process at all
- f. Checklists should not be used, as these slow down the process
- g. Defects found are welcomed and expressed objectively

- A. d, e and g.
- B. b, c and f.

C. a, c and d.

D. a, f and g.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 262

What is important to do when working with software development models?

A. To adapt the models to the context of project and product characteristics.

B. To choose the waterfall model because it is the first and best proven model.

C. To start with the V-model and then move to either iterative or incremental models.

D. To only change the organization to fit the model and not vice versa.

NEW QUESTION: 267

You have investigated different possibilities and selected four of them to present to IT management. Which of the proposals will you most likely give your highest recommendations? 3 credits

- A.** Insourcing of test automation based on an offer from a local company ABC that has people who are specialists in system level capture-replay automation tools and they also do regular training courses in test automation methods and tools. They can then work closely with Vicki.
- B.** Solution from a tool vendor offering to educate two test team members in the use of their easy-to-use test automation capture replay tool over the first 3 month and based on that build the regression test suite. In addition to Vicki, Steve is the only one that has time available to be educated.
- C.** Internal offer from the development department of XYZ to create the regression package using CppUnit as test automation tool. One of the development groups have very good experiences in automating unit tests, and they are willing to do training as well.
- D.** Outsourcing of test automation based on an offer from an Asian company, AsiaAutoTest, which has people who are specialists in system level capture-replay automation tools. They also offer training and besides they offer to run and maintain the regression tests in the future.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 268

One of the roles in a review is that of moderator, which of the following best describes this role?

- A. Allocates time in the plan, decides which reviews will take place and that the benefits are delivered.
- B. Writes the document to be reviewed, agrees that the document can be reviewed, and updates the document with any changes.
- C. Documents all issues raised in the review meeting, records problems and open points.
- D. Plans the review, runs the review meeting and ensures that follow-up activities are completed.
