Import the file as Contacts with duplicate detection enabled.	Assure the file is in the proper format and data exists for all required fields.
	Import the file as Leads with duplicate detection enabled.
	Relate each Lead to a Contact.
	Use workflows to link contacts for unmatched leads.

NEW QUESTION: 130

Steps

- Create a workflow that updates the lead records with the sales-ready score and grades when the lead score changes.
- Set up an action that tells the system what to do to the lead score when the defined conditions exist.
- Set the entity target of your lead scoring model to Account, Contact or Lead.
- Set the entity target of your lead scoring model to Account or Contact.
- Establish grades and a sales-ready score to identify what minimum lead score must exist before a lead is promoted for attention by a salesperson.
- Set conditions for modifying the lead score based on either behavioral rules, like email clicks or event registrations, or data conditions on the record.
- Create a workflow that runs the conditions against all leads whenever any of the fields in the condition change.
- Create the logic for your conditions by adding the entity to monitor, the frequency and date range of the checks, and an expression defining what to check.
