NEW QUESTION: 14

Q: A company is planning to implement Dynamics 365 Finance. The company has a large number of users and a complex data environment. The company wants to ensure that the implementation is successful and that the data is accurate. The company is considering the following options:

- A. Implement Dynamics 365 Finance on-premises.
- B. Implement Dynamics 365 Finance in the cloud.
- C. Implement Dynamics 365 Finance in a hybrid environment.
- D. Implement Dynamics 365 Finance in a multi-cloud environment.

The diagram illustrates the relationship between different components in a system. It is divided into four main sections:

- Functionalities:** A vertical list of three items: Workflow, Purchasing policy, and Audit policy.
- Answer Area:** A large rectangular area containing the Microsoft logo and a large, faint watermark reading "Krdump.com".
- Requirement:** A vertical list of three items: Approve purchase requisitions over \$50, Review offsite travel expenses, and Enforce vendor invoice compliance.
- Functionality:** A vertical list of three items, each labeled "Functionality".

Arrows indicate the flow of information or relationships between these sections. Arrows point from the Functionalities section to the Answer Area, and from the Answer Area to the Requirement section. Arrows also point from the Requirement section to the Functionality section.

Functionalities	Requirement	Functionality
Workflow	Approve purchase requisitions over \$50.	Workflow
Purchasing policy	Review offsite travel expenses.	Purchasing policy
Audit policy	Enforce vendor invoice compliance.	Audit policy

Functionalities

- Workflow
- Purchasing policy
- Audit policy

Requirement

- Approve purchase requisitions over \$50.
- Review offsite travel expenses.
- Enforce vendor invoice compliance.

Functionality

- Workflow
- Purchasing policy
- Audit policy

Compile binaries into a package for build and release pipelines.	Dynamics Lifecycle Services (LCS) Asset Upload Dynamics Lifecycle Services (LCS) Asset Deployment Create Deployable Package Add Licenses to Deployable Package Update Model Version

Answer:

Task

Add a package to a Lifecycle Services (LCS) project asset library.

- Dynamics Lifecycle Services (LCS) Asset Upload
- Dynamics Lifecycle Services (LCS) Asset Deployment
- Create Deployable Package
- Add Licenses to Deployable Package
- Update Model Version

Add a package from a Lifecycle Services (LCS) project asset library to a non-production environment.

- Dynamics Lifecycle Services (LCS) Asset Upload
- Dynamics Lifecycle Services (LCS) Asset Deployment
- Create Deployable Package
- Add Licenses to Deployable Package
- Update Model Version

Compile binaries into a package for build and release pipelines.

- Dynamics Lifecycle Services (LCS) Asset Upload
- Dynamics Lifecycle Services (LCS) Asset Deployment
- Create Deployable Package
- Add Licenses to Deployable Package
- Update Model Version

Requirement	Task
Add a package to a Lifecycle Services (LCS) project asset library.	- Dynamics Lifecycle Services (LCS) Asset Upload - Dynamics Lifecycle Services (LCS) Asset Deployment - Create Deployable Package - Add Licenses to Deployable Package - Update Model Version
Add a package from a Lifecycle Services (LCS) project asset library to a non-production environment.	- Dynamics Lifecycle Services (LCS) Asset Upload - Dynamics Lifecycle Services (LCS) Asset Deployment - Create Deployable Package - Add Licenses to Deployable Package - Update Model Version
Compile binaries into a package for build and release pipelines.	- Dynamics Lifecycle Services (LCS) Asset Upload - Dynamics Lifecycle Services (LCS) Asset Deployment - Create Deployable Package - Add Licenses to Deployable Package - Update Model Version

NEW QUESTION: 22

1. **Introduction:** Dynamics 365 is a powerful suite of business applications that can help you streamline your operations and improve your productivity. In this article, we will explore the key features and benefits of Dynamics 365, and how it can be used to transform your business.

2. **Key Features:** Dynamics 365 offers a wide range of features, including:

- **Customer Relationship Management (CRM):** Manage your sales pipeline, track leads, and improve customer service.
- **Financial Management:** Streamline your accounting, manage your budget, and generate financial reports.
- **Human Resources (HR):** Manage your employee database, track time and attendance, and handle payroll.
- **Marketing Automation:** Create targeted marketing campaigns, track leads, and measure ROI.
- **Supply Chain Management (SCM):** Optimize your inventory, manage your suppliers, and improve logistics.

3. **Benefits:** Dynamics 365 offers numerous benefits, including:

- **Increased Efficiency:** Automate repetitive tasks and streamline workflows to save time and reduce errors.
- **Improved Collaboration:** Enable seamless communication and collaboration between different departments.
- **Enhanced Data Security:** Implement robust security measures to protect your sensitive business data.
- **Scalability:** Scale your operations up or down as needed, without the need for significant infrastructure changes.
- **Cost Savings:** Reduce operational costs by optimizing resource allocation and improving efficiency.

4. **Conclusion:** Dynamics 365 is a powerful business application suite that can help you transform your business. By leveraging its key features and benefits, you can improve your productivity, streamline your operations, and achieve your business goals.

NEW QUESTION: 26

You are implementing Dynamics 365 Finance and Operations. You need to configure the system to support the following requirements:

- * The system must be able to track the location of inventory items.
- * The system must be able to track the quantity of inventory items.
- * The system must be able to track the status of inventory items.
- * The system must be able to track the value of inventory items.
- * The system must be able to track the cost of inventory items.

 Which of the following options should you select?

A. Inventory tracking
 B. Inventory valuation
 C. Inventory costing
 D. Inventory management

 Answer: A

Cycle count options

User directed
System directed
Cycle count grouping
Spot cycle count

Answer Area

Requirement
Specify a cycle counting work ID that has a status of **Open**.
Automatically assign a cycle counting work ID to a worker.
Group work IDs that are specific to a particular location, zone, or work pool.
Count items in a warehouse location at any time.

Cycle count option
Cycle count option
Cycle count option
Cycle count option

Answer:

Cycle count options	Requirement	Cycle count option
User directed	Specify a cycle counting work ID that has a status of Open .	User directed
System directed	Automatically assign a cycle counting work ID to a worker.	System directed
Cycle count grouping	Group work IDs that are specific to a particular location, zone, or work pool.	Cycle count grouping
Spot cycle count	Count items in a warehouse location at any time.	Spot cycle count

□□

Cycle count options	Requirement	Cycle count option
User directed	Specify a cycle counting work ID that has a status of Open .	User directed
System directed	Automatically assign a cycle counting work ID to a worker.	System directed
Cycle count grouping	Group work IDs that are specific to a particular location, zone, or work pool.	Cycle count grouping

NEW QUESTION: 28

Dynamics 365 Supply Chain Management (SCM) is a cloud-based solution that helps businesses manage their supply chain operations. It provides a comprehensive view of the supply chain, from procurement to production to distribution. The solution is designed to be flexible and scalable, allowing businesses to tailor it to their specific needs. It also offers a range of tools and features to help businesses optimize their supply chain performance, such as demand forecasting, inventory management, and logistics optimization.

Tools

- Business process library
- Task Recorder
- Feature Management Workspace
- Service Update Availability

Requirement

Display the new business process visually.

Create user manuals in Microsoft Word format.

View a Dynamics 365 Supply Chain Management dashboard that has a list of features delivered in each release.

View a website that lists target dates for upcoming product service updates including preview availability, general availability, and end of service.

NEW QUESTION: 39

Microsoft Dynamics 365 Finance and Operations is being implemented for a new customer. The customer wants to ensure that the system is secure and that only authorized users can access the system. The customer also wants to ensure that the system is scalable and that it can handle a large number of users. The customer has a budget of \$100,000 for the implementation. The customer wants to know what the best way to implement the system is.

The customer has a budget of \$100,000 for the implementation. The customer wants to know what the best way to implement the system is.

The customer has a budget of \$100,000 for the implementation. The customer wants to know what the best way to implement the system is.

Actions

- Add the **CustCustomerMasterInquire** duty to the **ReadOnlyUserAR** role.
- Create a new security role named **ReadOnlyUserAR**.
- Add the **Customers** privilege to the **CustCustomerMasterInquire** duty.
- Add the custom role **ReadOnlyUserAR** to users.
- Create a custom duty named **CustomerViewList**.
- Add the **Customers** privilege to the **CustomerViewList** duty.
- Add the **CustomerViewList** duty to the **ReadOnlyUserAR** role.

Answer area

Answer:

Actions

Add the **CustCustomerMasterInquire** duty to the **ReadOnlyUserAR** role.

Create a new security role named **ReadOnlyUserAR**.

Add the **Customers** privilege to the **CustCustomerMasterInquire** duty.

Add the custom role **ReadOnlyUserAR** to users.

Create a custom duty named **CustomerViewList**.

Add the **Customers** privilege to the **CustomerViewList** duty.

Add the **CustomerViewList** duty to the **ReadOnlyUserAR** role.

Answer area

Create a new security role named **ReadOnlyUserAR**.

Create a custom duty named **CustomerViewList**.

Add the **Customers** privilege to the **CustomerViewList** duty.

Add the **CustomerViewList** duty to the **ReadOnlyUserAR** role.

Add the custom role **ReadOnlyUserAR** to users.

☐☐:

NEW QUESTION: 48

You are implementing a new Dynamics 365 Finance solution for a company. The company has a requirement to track the status of sales orders. The sales orders are created in the Dynamics 365 Finance system and are then processed by the sales team. The sales team needs to be able to track the status of the sales orders from the time they are created until they are completed.
 You need to recommend a solution that meets the requirement.
 What should you recommend?
 A. Create a new table in the Dynamics 365 Finance system to track the status of sales orders.
 B. Use the Dynamics 365 Finance system's built-in sales order tracking functionality.
 C. Create a new Dynamics 365 Finance workflow to track the status of sales orders.
 D. Use the Dynamics 365 Finance system's built-in sales order tracking functionality.

Requirement	Tool
E-commerce sales orders	Dynamics 365 Logic app Power App
Vendor purchase orders	Dynamics 365 Third party CPQ Third party EDI Third party OCR
User2's issue	Dynamics 365 Third party CPQ Third party EDI Third party OCR

Answer:

□□:

Actions	Answer area
Pack the box for the sales order.	Take a sales order.
Use a production order to create the product.	Use a production order to create the product.
Pick for the sales order.	Pick for the sales order.
Take a sales order.	Pack the box for the sales order.
Process the sales order invoice.	Process the sales order invoice.

Actions	Answer area
Pack the box for the sales order.	
Use a production order to create the product.	
Pick for the sales order.	
Take a sales order.	
Process the sales order invoice.	

Answer:

Action

Integration component

Create the sales order from the work order.

Dual-write
Custom service
Batch OData API

Trigger the change-based alert workflow.

Activities
Dual-write
Business events
Data Integrator

NEW QUESTION: 114

Which of the following is a feature of the Dynamics 365 Finance implementation? (Select all that apply.)

Feature	Current application	Dynamics 365 implementation
Business logic	Business logic is implemented as stored procedures in SQL Server.	Business logic will be implemented as Power Automate flows.
Data	Data is stored in SQL Server tables.	Data will be imported by using Dynamics 365 APIs.
Reports	Reports are stored in SQL Server Reporting Services.	Reports will be recreated by using Power BI.
User Interface	HTML markup for the user interface is stored as text values in SQL Server.	HTML markup for the user interface will be migrated directly by using FetchXML queries.
Users	Users are configured as SQL Server user account.	Users will be configured as Office 365 user accounts.

Which of the following is a feature of the Dynamics 365 Finance implementation? (Select all that apply.)

- A. Business logic is implemented as stored procedures in SQL Server.
- B. Data is stored in SQL Server tables.
- C. Reports are stored in SQL Server Reporting Services.
- D. HTML markup for the user interface is stored as text values in SQL Server.
- E. Users are configured as SQL Server user account.

Answer: (SHOW ANSWER)

NEW QUESTION: 153

□ □□□ □□ SQL Server □□□□□□ □□□□ □□ □□ □□□□□□□□ □□□□ □□□□. □ □□□ Dynamics 365 Finance□ □□□ □□□□□□. □□ □□ □□ □□ □□□ □□□ □□□ □□ □□ □□ □□□□□□.

Feature	Current application	Dynamics 365 implementation
Business logic	Business logic is implemented as stored procedures in SQL Server.	Business logic will be implemented as Power Automate flows.
Data	Data is stored in SQL Server tables.	Data will be imported by using Dynamics 365 APIs.
Reports	Reports are stored in SQL Server Reporting Services.	Reports will be recreated by using Power BI.
User Interface	HTML markup for the user interface is stored as text values in SQL Server.	HTML markup for the user interface will be migrated directly by using FetchXML queries.
Users	Users are configured as SQL Server user account.	Users will be configured as Office 365 user accounts.

Which of the following is a feature of Dynamics 365 implementation?

- A. Business logic is implemented as stored procedures in SQL Server.
- B. Data is imported by using Dynamics 365 APIs.
- C. Reports are recreated by using Power BI.
- D. HTML markup for the user interface is stored as text values in SQL Server.
- E. Users are configured as Office 365 user accounts.

NEW QUESTION: 166

Which Dynamics 365 Supply Chain Management feature allows you to create a workflow to review, adjust, and approve customer invoices? A. Budget account entry B. Invoice review C. Invoice approval D. Invoice workflow E. Invoice protection

A. Budget account entry
B. Invoice review
C. Invoice approval
D. Invoice workflow
E. Invoice protection

Answer: (SHOW ANSWER)

The correct answer is D. Invoice workflow. This feature allows you to create a workflow to review, adjust, and approve customer invoices.

Explanation:

Dynamics 365 Supply Chain Management includes a feature called Invoice workflow that allows you to create a workflow to review, adjust, and approve customer invoices. This feature is part of the Finance and Operations module.

2. Which solution can be used to consolidate data from multiple sources? (Select all that apply.)
3. Which solution can be used to store historical data? (Select all that apply.)
- Answer: <https://go.microsoft.com/fwlink/p/?LinkId=866544> (Dynamics 365 Finance and Operations)

NEW QUESTION: 209

A company is implementing Dynamics 365 Finance and Operations (SCM) and wants to consolidate data from multiple sources. The company has an existing ERP system, Azure Data Lake, Data Migration Framework, and F&O Data Feeds. The company wants to consolidate data on a single master customer number, store historical data, and import customer data. Which solution can be used to achieve these requirements? (Select all that apply.)

Options:

- Existing ERP system
- Azure Data Lake
- Data Migration Framework
- F&O Data Feeds

Answer: Existing ERP system, Azure Data Lake, Data Migration Framework, F&O Data Feeds

Solutions	Requirement	Solution
Existing ERP system	Consolidate on the single master customer number.	
Azure Data Lake	Store historical data.	
Data Migration Framework	Import customer data.	
F&O Data Feeds		

Answer:

Solutions	Requirement	Solution
Existing ERP system	Consolidate on the single master customer number.	Data Migration Framework
Azure Data Lake	Store historical data.	Azure Data Lake
Data Migration Framework	Import customer data.	Existing ERP system
F&O Data Feeds		

Answer: <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/data-entities/azure-data-lake-overview>

NEW QUESTION: 213

A company is planning to implement Dynamics 365. The company has a budget of \$100,000. The company is considering the following options:

- Option 1: Implement Dynamics 365 Finance and Operations. This option costs \$80,000 and provides the company with a comprehensive set of financial and operational tools.
- Option 2: Implement Dynamics 365 Sales and Marketing. This option costs \$60,000 and provides the company with tools for managing sales and marketing activities.
- Option 3: Implement Dynamics 365 Field Service. This option costs \$40,000 and provides the company with tools for managing field service activities.
- Option 4: Implement Dynamics 365 Customer Service. This option costs \$20,000 and provides the company with tools for managing customer service activities.

The company wants to implement the option that provides the most value for the least cost. Which option should the company implement?

A. Option 1
 B. Option 2
 C. Option 3
 D. Option 4

Code management strategy for ALM process.

ALM component	Strategy
Code management strategy Dynamics 365 custom development	A Visual Studio project per workstream
Package type to use	Deploy as its own package.

NEW QUESTION: 221

Microsoft Dynamics 365 Finance.

 The standard interface in Dynamics 365 Finance that can accept machine-ready invoice metadata format with applicable attachments is Vendor invoice automation.

 The technology that converts contained images into text format is Optical character recognition (OCR).

 The electronic format to send invoices is EDI 810.

 The workspace designed for vendors to view invoice information and to submit invoices to Dynamics 365 Finance is Vendor collaboration.

 Answer: Vendor invoice automation, Optical character recognition (OCR), EDI 810, Vendor collaboration.

Answer Area		
Solutions	Scenario	Solution
Vendor invoice automation	Standard interface in Dynamics 365 Finance that can accept machine-ready invoice metadata format with applicable attachments.	
Optical character recognition (OCR)	Technology that converts contained images into text format.	
EDI 810	Electronic format to send invoices.	
Vendor collaboration	Workspace designed for vendors to view invoice information and to submit invoices to Dynamics 365 Finance.	

Answer:

Answer Area		
Solutions	Scenario	Solution

NEW QUESTION: 248

You are implementing Dynamics 365 for Finance and Operations. You need to ensure that the system is secure and that data is protected. You also need to ensure that the system is available and that users can access the system.

Which of the following are the correct requirements for the system?

A. The system must be secure and data must be protected.

B. The system must be available and users must be able to access the system.

C. The system must be secure and users must be able to access the system.

D. The system must be available and data must be protected.

E. The system must be secure, available, and data must be protected.

F. The system must be available, secure, and users must be able to access the system.

G. The system must be secure, available, and users must be able to access the system.

H. The system must be available, secure, and data must be protected.

I. The system must be secure, available, and data must be protected.

J. The system must be available, secure, and users must be able to access the system.

NEW QUESTION: 293

Which of the following are phases of the Dynamics 365 Finance Project Operations implementation process?
Select all that apply.
A. Envision
B. Onboard
C. Drive value
D. Measure the effectiveness of the plan

Answer: B,D (LEAVE A REPLY)

Microsoft Dynamics 365 Project Operations is a cloud-based project management solution that helps organizations manage their projects more effectively. It is designed to be used by project managers, team leads, and other stakeholders involved in project execution. The implementation process for Dynamics 365 Project Operations is divided into three main phases: Envision, Onboard, and Drive value. (Note: The question asks for the phases of the implementation process, but the provided options include a fourth phase, Measure the effectiveness of the plan, which is not part of the standard implementation process.)

1. Envision: This phase involves defining the project, identifying the team, and setting up the project environment.
2. Onboard: This phase involves onboarding the team, configuring the system, and setting up the project data.
3. Drive value: This phase involves executing the project, monitoring progress, and driving value from the project.

NEW QUESTION: 294

Which of the following are phases of the Dynamics 365 Project Operations implementation process?
Select all that apply.
A. Envision
B. Onboard
C. Drive value
D. Measure the effectiveness of the plan

Phases	Answer Area
Envision	
Onboard	Create an adoption plan.
Drive value	Measure the effectiveness of the plan.

Answer:

- Business process library
- Task Recorder
- Feature Management Workspace
- Service Update Availability

- Display the new business process visually.
- Create user manuals in Microsoft Word format.
- View a Dynamics 365 Supply Chain Management dashboard that has a list of features delivered in each release.
- View a website that lists target dates for upcoming product service updates including preview availability, general availability, and end of service.

Match old customer IDs to new IDs.	Common Data Model folder

NEW QUESTION: 324

A Dynamics 365 administrator is configuring a security role for a new form.

* The administrator wants to ensure that the security role is assigned to the form.

* The administrator wants to ensure that the security role is assigned to the form.

The administrator wants to ensure that the security role is assigned to the form.

The administrator wants to ensure that the security role is assigned to the form. The administrator wants to ensure that the security role is assigned to the form. The administrator wants to ensure that the security role is assigned to the form.

The administrator wants to ensure that the security role is assigned to the form.

Answer: The administrator wants to ensure that the security role is assigned to the form.

Tools	Answer Area
Segregation of duties rules form	Requirement
Security diagnostics tool	Identify the security roles that have access to the form.
Security duty assignments report	Identify the duties that grant access to the form.
Form information form	Tool

Answer:

Phases	Answer Area	Phase
Source	Action Convert the data into a format that can be imported into Dynamics 365 Supply Chain Management. Consolidate multiple fields into a single field. Validate the data against Dynamics 365 Supply Chain Management business logic.	Staging
Staging		Staging
Target		Target

NEW QUESTION: 326

You are implementing Dynamics 365 Finance. You need to ensure that the data is imported into Dynamics 365 Supply Chain Management. What should you do?

A. Convert the data into a format that can be imported into Dynamics 365 Supply Chain Management.
 B. Consolidate multiple fields into a single field.
 C. Validate the data against Dynamics 365 Supply Chain Management business logic.
 D. All of the above.

Deployment types	Requirement	Deployment type
On-premises only	Vendor collaboration	Deployment type
Cloud only	Office integration	Deployment type
Cloud or on-premises	Warehousing Power BI reports	Deployment type

Answer:

Deployment types	Requirement	Deployment type

You are implementing Dynamics 365 Finance. You need to ensure that the data is imported into Dynamics 365 Supply Chain Management. What should you do?

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/fin-ops/get-started/cloud-prem-comparison>

NEW QUESTION: 327

- You are implementing Dynamics 365 Finance. You need to ensure that the data is imported into Dynamics 365 Supply Chain Management. What should you do?
- A. Dynamics 365 Finance
 - B. Microsoft Power BI
 - C. Microsoft Word
 - D. All of the above

Answer: A (LEAVE A REPLY)

NEW QUESTION: 328

You are implementing Dynamics 365 Finance. You need to ensure that the data is imported into Dynamics 365 Supply Chain Management. What should you do?

Which Microsoft Azure service can be used to build a predictive demand forecasting tool? Select three options.
1. Source control
2. Track support incidents
3. Predictive demand forecasting

Answer:

Answer Area

Tool	Service
Source control	Logic apps Microsoft Azure Active Directory Microsoft Azure DevOps Microsoft Azure Machine Learning
Track support incidents	Logic apps Microsoft Azure Active Directory Microsoft Azure DevOps Microsoft Azure Machine Learning
Predictive demand forecasting	Logic apps Microsoft Azure Active Directory Microsoft Azure DevOps Microsoft Azure Machine Learning

These are the selections for the tool: Track support incidents.

Which Microsoft Azure service can be used to build a predictive demand forecasting tool? Select three options.

Answer Area

Tool	Service
Source control	Microsoft Azure DevOps
Track support incidents	Microsoft Azure DevOps
Predictive demand forecasting	Microsoft Azure Machine Learning

NEW QUESTION: 329

Which Dynamics 365 Finance app can be used to import and export data? Select three options.
1. Dynamics 365 Finance
2. Dynamics 365 Supply Chain Management
3. Dynamics 365 Customer Engagement

- A. Dynamics 365 Finance
- B. Dynamics 365 Supply Chain Management
- C. Dynamics 365 Customer Engagement
- D. XPO

Answer: C (LEAVE A REPLY)

Which Dynamics 365 Finance app can be used to import and export data?
<https://docs.microsoft.com/en-us/dynamicsax-2012/appuser-itpro/what-s-new-data-import-export-and-migration>

NEW QUESTION: 330

Which Dynamics 365 Finance app can be used to import and export data? Select three options.
1. Dynamics 365 Finance
2. Dynamics 365 Supply Chain Management
3. Dynamics 365 Customer Engagement

Which tool can be used to create test scenarios that contain multiple processes, each relying on data passed from the prior process?
Options: Task recorder, Regression suite automation tool (RSAT), Business process modeler, Chain test cases, Derived test cases, Individual test cases.

Requirement	Function
Enable click-by-click documentation of testing scenarios.	▼ Task recorder Regression suite automation tool (RSAT) Business process modeler
Create test scenarios that contain multiple processes, each relying on data passed from the prior process.	▼ Chain test cases Derived test cases Individual test cases
Develop test scenario variants of the same process that are run with different data sets.	▼ Chain test cases Derived test cases Individual test cases

Answer:

Requirement	Function
Enable click-by-click documentation of testing scenarios.	▼ Task recorder Regression suite automation tool (RSAT) Business process modeler
Create test scenarios that contain multiple processes, each relying on data passed from the prior process.	▼ Chain test cases Derived test cases Individual test cases
