NEW QUESTION: 3

Which of the following Microsoft 365 services are available in the Microsoft Yammer mobile app?
 Select all that apply.
 A. Microsoft SQL Server Reporting Services
 B. Microsoft SQL Server Analysis Services
 C. Azure Information Protection
 D. Microsoft Dynamics 365 CRM

- A. Microsoft SQL Server Reporting Services
- B. Microsoft SQL Server Analysis Services
- C. Azure Information Protection
- D. Microsoft Dynamics 365 CRM

Answer: B (LEAVE A REPLY)

NEW QUESTION: 4

Which of the following Microsoft 365 services are available in the Microsoft Yammer mobile app?
 Select all that apply.
 A. Microsoft SQL Server Reporting Services
 B. Microsoft SQL Server Analysis Services
 C. Azure Information Protection
 D. Microsoft Dynamics 365 CRM

Q: Which of the following are CSP pricing models? (Select all that apply.)
 CSP pricing models include Direct bill, Indirect reseller, Enterprise agreement, and Microsoft Open.
 A: Direct bill, Indirect reseller, Enterprise agreement, Microsoft Open.

CSP pricing models	Answer Area	Definition	CSP pricing model
Direct bill		Partners purchase Microsoft products and subscriptions from Microsoft and sell them through their in-house sales staff	<input type="checkbox"/>
Indirect reseller		Providers purchase Microsoft products and subscriptions from Microsoft and sell them to customers through other third parties	<input type="checkbox"/>
Enterprise agreement			
Microsoft Open			

Answer:

CSP pricing models	Answer Area	Definition	CSP pricing model
Direct bill		Partners purchase Microsoft products and subscriptions from Microsoft and sell them through their in-house sales staff	<input checked="" type="checkbox"/>
Indirect reseller		Providers purchase Microsoft products and subscriptions from Microsoft and sell them to customers through other third parties	<input checked="" type="checkbox"/>
Enterprise agreement			
Microsoft Open

NEW QUESTION: 5

Q: Which of the following are true? (Select all that apply.)
 Azure AD Connect can be used to sync passwords from on-premises to the cloud.
 Users can sign in again to access Microsoft 365 without re-entering their password.
 A: Azure AD Connect can be used to sync passwords from on-premises to the cloud. Users can sign in again to access Microsoft 365 without re-entering their password.

Statement	Yes	No
Users have the same passwords in the cloud and on-premises.	<input type="radio"/>	<input type="radio"/>
Users sign in again to access Microsoft 365.	<input type="radio"/>	<input type="radio"/>
You can configure federated authentication to require a smart card.	<input type="radio"/>	<input type="radio"/>

Answer:

The email notification that the user receives displays a preview of the document text and the associated comment.

Yes

No

When the user clicks the link in the email, the document opens to the comment in the file.

The user can respond to the comment in the document directly from the email.

NEW QUESTION: 24

□□ □ □□ □□ □□ □□□ □□ □□□□□. □□□ □□□ □□□□ □□□□□.
 □□: □ □□□ □□□ 1□□ □□□ □□□□.

Statement	Yes	No
Adopting cloud applications reduces the number of on-premises servers and services to manage.	<input type="radio"/>	<input type="radio"/>
For remote users, accessing applications stored in the cloud is easier than accessing applications stored on a company network.	<input type="radio"/>	<input type="radio"/>
A loss of internet connectivity will not significantly impact functionality for users accessing applications and services in the cloud.	<input type="radio"/>	<input type="radio"/>

Answer:

Statement

Yes

No

Adopting cloud applications reduces the number of on-premises servers and services to manage.

For remote users, accessing applications stored in the cloud is easier than accessing applications stored on a company network.

A loss of internet connectivity will not significantly impact functionality for users accessing applications and services in the cloud.

NEW QUESTION: 25

Microsoft 365. Windows 10. WaaS(Windows as a Service). Servicing channels. Deployment rings. 100. 1000.

Terms	Definition	Term
Windows Insider previews	Early build that are released to the public during the feature-development phase	
Servicing channels	A method for controlling the frequency at which organizations deploy Windows 10 features	
Deployment rings	A method of gradually deploying Windows 10 features by using multiple sets of targeted devices	

Answer:

Terms	Definition	Term
Windows Insider previews	Early build that are released to the public during the feature-development phase	Windows Insider previews
Servicing channels	A method for controlling the frequency at which organizations deploy Windows 10 features	Servicing channels
Deployment rings	A method of gradually deploying Windows 10 features by using multiple sets of targeted devices	Deployment rings

Identity solution

- System-assigned managed identity
- Azure AD business to customer (B2C) identity

NEW QUESTION: 72

Microsoft 365 is a cloud-based productivity suite that includes a variety of applications and services. One of the key features of Microsoft 365 is its ability to provide a secure and compliant environment for your organization's data and applications. This is achieved through a combination of advanced security technologies and robust governance and compliance capabilities. For example, Microsoft 365 offers features like Adaptive Access, Threat Protection, and Policy Optimization to help protect your data and applications from threats and ensure they are used in a compliant manner. Additionally, Microsoft 365 provides a range of governance and compliance capabilities, such as Governance and compliance and Forensics and response automation, to help you manage your organization's risk and ensure you are meeting your regulatory requirements. Microsoft 365 is designed to be easy to use and integrate with other Microsoft products, making it a powerful tool for organizations of all sizes.

Features

- Adaptive Access
- Threat Protection
- Policy Optimization

Capability

- Governance and compliance
- Forensics and response automation

Feature

Answer:

Features

- Adaptive Access
- Threat Protection
- Policy Optimization

Capability

- Governance and compliance
- Forensics and response automation

Feature

- Policy Optimization
- Threat Protection

NEW QUESTION: 73

Microsoft 365 is a cloud-based productivity suite that includes a variety of applications and services. One of the key features of Microsoft 365 is its ability to provide a secure and compliant environment for your organization's data and applications. This is achieved through a combination of advanced security technologies and robust governance and compliance capabilities. For example, Microsoft 365 offers features like Adaptive Access, Threat Protection, and Policy Optimization to help protect your data and applications from threats and ensure they are used in a compliant manner. Additionally, Microsoft 365 provides a range of governance and compliance capabilities, such as Governance and compliance and Forensics and response automation, to help you manage your organization's risk and ensure you are meeting your regulatory requirements. Microsoft 365 is designed to be easy to use and integrate with other Microsoft products, making it a powerful tool for organizations of all sizes.

The E5 edition includes additional features, such as Microsoft Defender for Office 365 and Microsoft Defender for Cloud. Microsoft 365 is available in several regions, including North America, Europe, and Asia. It is available in both public and private clouds.

- A. Microsoft Exchange Online is a cloud-based email service that provides a range of features, including email, calendar, and contacts.
- B. Microsoft Exchange Online is a cloud-based email service that provides a range of features, including email, calendar, and contacts.
- C. Advanced Threat Protection is a cloud-based security service that provides a range of features, including email protection, document protection, and device protection.
- D. Zero-hour auto purge (ZAP) is an email protection feature in Office 365 that retroactively detects and neutralizes malicious phishing, spam, or malware messages that have already been delivered to Exchange Online mailboxes.
- E. Microsoft Exchange Online is a cloud-based email service that provides a range of features, including email, calendar, and contacts.

Answer: D (LEAVE A REPLY)

Explanation Zero-hour auto purge (ZAP) is an email protection feature in Office 365 that retroactively detects and neutralizes malicious phishing, spam, or malware messages that have already been delivered to Exchange Online mailboxes. ZAP is available with the default Exchange Online Protection (EOP) that's included with any Office 365 subscription that contains

Exchange Online mailboxes. ZAP doesn't work in standalone EOP environments that protect on-premises Exchange mailboxes

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/zero-hour-auto-purge>

NEW QUESTION: 90

NEW QUESTION: 145

Microsoft IaaS (Infrastructure as a Service) is a cloud service model that allows you to rent IT infrastructure—such as servers and storage—from a third party on a pay-as-you-go basis. IaaS is the most basic level of cloud computing, and it allows you to avoid investing in and managing physical hardware. IaaS is often used for applications that require a lot of compute power, such as data processing and analytics.

- A. Virtual machines
- B. Operating systems
- C. Applications
- D. Storage
- E. Network

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 146

Which Microsoft 365 module is used to manage connections, insights, learning, and topics? The modules that are named Connections, Insights, Learning, and Topics are part of Microsoft Viva.

Answer:

NEW QUESTION: 147

Microsoft 365 feature phases are used to manage the release of new features. The feature phases are Private, Public Preview, and General Availability. The Private phase is used for testing and feedback. The Public Preview phase is used for testing and feedback. The General Availability phase is used for the final release of a feature. The feature phases are used to manage the release of new features. The feature phases are used to manage the release of new features.

Feature Phases	Development step	Feature phase
Private	Complete compliance testing.	Feature phase
Public Preview	Complete QA testing for recently released features.	Feature phase
General Availability	Prepare QA results and end-user documentation.	Feature phase

Answer:

Feature Phases

- Private
- Public Preview
- General Availability

Development step

- Complete compliance testing.
- Complete QA testing for recently released features.
- Prepare QA results and end-user documentation.

Feature phase

- Private Feature phase
- Public Preview Feature phase
- General Availability phase

NEW QUESTION: 148

Microsoft 365 global administrators use Microsoft Workplace Analytics to examine network traffic patterns for troubleshooting purposes.

Statement	Yes	No
Microsoft 365 global administrators use Microsoft Workplace Analytics to examine network traffic patterns for troubleshooting purposes.	<input type="radio"/>	<input type="radio"/>
Microsoft Workplace Analytics can be helpful in understanding the collaboration patterns and usage of various Microsoft 365 services.	<input type="radio"/>	<input type="radio"/>
Microsoft Workplace Analytics helps employees work more efficiently so that they can become more productive.	<input type="radio"/>	<input type="radio"/>

Answer:

Statement	Yes	No
Microsoft 365 global administrators use Microsoft Workplace Analytics to examine network traffic patterns for troubleshooting purposes.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft Workplace Analytics can be helpful in understanding the collaboration patterns and usage of various Microsoft 365 services.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Workplace Analytics helps employees work more efficiently so that they can become more productive.	<input type="radio"/>	<input checked="" type="radio"/>
