- 3 Microsoft 365 E3 and 1 Microsoft 365 F3.
- Microsoft 365 E3, Microsoft 365 E5, and Microsoft 365 F3.
- Microsoft 365 E3, Microsoft 365 E5, and 1 Microsoft 365 F3.

The screenshot shows a Microsoft licensing interface. On the left, under the heading "Licenses", there are three buttons: "Microsoft 365 E3", "Microsoft 365 E5", and "Microsoft 365 F3". On the right, under the heading "Answer Area", there is a table with two columns: "User" and "License". The "User" column lists "Team1", "Team2", and "Team3". The "License" column has three empty input boxes corresponding to each team.

Answer:

This screenshot shows the same Microsoft licensing interface as above, but with the correct answer selected. In the "Licenses" section, the "Microsoft 365 F3" button is highlighted with a green border. In the "Answer Area" table, the "License" column now contains the following values: "Microsoft 365 F3" for Team1, "Microsoft 365 E5" for Team2, and "Microsoft 365 F3" for Team3.

NEW QUESTION: 49

Microsoft IaaS (Infrastructure as a Service) is a cloud service model that provides virtualized computing resources over the Internet. IaaS allows you to rent infrastructure, such as virtual machines, storage, and networks, from a cloud provider. You are responsible for installing and managing operating systems, applications, and data on the infrastructure. IaaS is suitable for applications that require high performance and control over the underlying hardware.

Which of the following are characteristics of IaaS? (Select three.)

- Users manage the operating system and applications.
- Users manage the hardware.
- Users manage the network.
- Users manage the virtual machines.
- Users manage the data.

Answer: A,B,C (LEAVE A REPLY)

NEW QUESTION: 50

Microsoft 365 is a cloud service model that provides a suite of productivity and collaboration tools over the Internet. Microsoft Exchange is a cloud-based email and calendar service that is part of Microsoft 365. It allows you to store and manage your email, calendar, and contacts in the cloud. Microsoft Exchange is suitable for organizations that need a secure and reliable email and calendar service.

Which of the following are characteristics of Microsoft Exchange? (Select three.)

- Users manage the email and calendar data.
- Users manage the hardware.
- Users manage the network.
- Users manage the virtual machines.
- Users manage the data.

NEW QUESTION: 82

Microsoft 365 Business admin center provides a simplified way to manage security features. In the admin center, you can do the following:

- Set application management settings for Android or iOS devices.
- Set application protection settings for Windows 10 devices.

- A. Set application management settings for Windows 10 devices.
- B. Set application protection settings for Windows 10 devices.
- C. Set application management settings for Windows 10 devices.
- D. Set application protection settings for Windows 10 devices.
- E. Set application management settings for Windows 10 devices.

Answer: (SHOW ANSWER)

You can manage many of the Microsoft 365 Business security features in the admin center, which gives you a simplified way to turn these features on or off. In the admin center, you can do the following:

Set application management settings for Android or iOS devices.

These settings include deleting files from an inactive device after a set period, encrypting work files, requiring that users set a PIN, and so on.

Set application protection settings for Windows 10 devices.

These settings can be applied to company data on both company-owned, or personally owned devices.

Set device protection settings for Windows 10 devices.

You can enable BitLocker encryption to help protect data in case a device is lost or stolen, and enable Windows Exploit Guard to provide advanced protection against ransomware.

Remove company data from devices.

You can remotely wipe company data if a device is lost, stolen, or an employee leaves your company.

Reset Windows 10 devices to their factory settings.

You can reset any Windows 10 devices that have device protection settings applied to them.

NEW QUESTION: 129

Cloud providers help to improve business continuity by offering built-in, one-click backup and recovery capabilities. Some providers also offer the ability to store backups in different geographic regions. When demand spikes or the organization needs more powerful compute resources, organizations can alter their resources instantly on demand. There are significant savings in resource, maintenance, and real estate costs, in addition to the ability to optimize workloads so that they cost less to run.

Answer: ([SHOW ANSWER](#))

C: Most cloud providers help to improve business continuity by offering built-in, one-click backup and recovery capabilities. Some providers also offer the ability to store backups in different geographic regions.

D: When demand spikes or the organization needs more powerful compute resources, organizations can alter their resources instantly on demand.

E: There are significant savings in resource, maintenance, and real estate costs, in addition to the ability to optimize workloads so that they cost less to run.

NEW QUESTION: 163

- Microsoft 365 .
- PDF . PDF .
- PDF .
- PDF .
- ?
- A. Microsoft Exchange
- B. .
- C. Advanced Threat Protection
- D. 0
- E. DKIM

Answer: ([SHOW ANSWER](#))

Explanation Zero-hour auto purge (ZAP) is an email protection feature in Office 365 that retroactively detects and neutralizes malicious phishing, spam, or malware messages that have already been delivered to Exchange Online mailboxes. ZAP is available with the default Exchange Online Protection (EOP) that's included with any Office 365 subscription that contains

Exchange Online mailboxes. ZAP doesn't work in standalone EOP environments that protect on-premises Exchange mailboxes

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/zero-hour-auto-purge>
