NEW QUESTION: 11

Which of the following is a Microsoft 365 cloud solution provider? (Select all that apply.)

- A. Microsoft Dynamics 365
- B. Cloud Solution Provider
- C. Cloud Solution Provider
- D. Microsoft 365

Answer: D (LEAVE A REPLY)

<https://docs.microsoft.com/en-us/partner-center/indirect-reseller-tasks-in-partner-center>

"As an indirect reseller in CSP, you work with indirect providers (also known as distributors) who have a direct relationship with Microsoft and can provide you with customer support and billing. Working with indirect providers means you don't have to start your own. Instead, you can work with an experienced technology provider to help ensure your success. In the provider-reseller (two-tier) model, the provider buys cloud solutions and services from Microsoft. You then resell them to customers."

NEW QUESTION: 12

Which of the following is a Microsoft Office 365 cloud solution provider? (Select all that apply.)

- A. Microsoft Dynamics 365
- B. Microsoft 365
- C. Microsoft 365
- D. Microsoft 365

Answer: (SHOW ANSWER)

NEW QUESTION: 13

Microsoft 365 cloud solution provider is a cloud solution provider.

Answer area

Cloud models

- Private
- Public
- Hybrid

Requirement

- Provide an on-demand sandbox environment.
- Provide failover capabilities between resources that you manage and resources in other regions.
- Deploy virtual machines that supports USB devices.

Cloud model

- Cloud model
- Cloud model
- Cloud model

Answer:

Answer area

Cloud models

- Private
- Public
- Hybrid

Requirement

- Provide an on-demand sandbox environment.
- Provide failover capabilities between resources that you manage and resources in other regions.
- Deploy virtual machines that supports USB devices.

Cloud model

- Public
- Hybrid
- Private

Explanation:

on demand Sandbox environment- PUBLIC

failover capabilities-HYBRID

VMs that support USB devices- PRIVATE

NEW QUESTION: 32

Which Microsoft 365 service is used to manage user accounts?

Microsoft 365 includes several services that help manage user accounts. Which of the following is used to manage user accounts?

Which of the following services is used to manage user accounts?

- A. Azure Active Directory
- B. Microsoft Entra ID
- C. Microsoft 365 Admin Center
- D. Microsoft 365 Security Center

Answer: D (LEAVE A REPLY)

<https://docs.microsoft.com/en-us/office365/servicedescriptions/office-365-platform-service-description/service-health-and-continuity>

NEW QUESTION: 33

Which Microsoft 365 service is used to manage user accounts?

Microsoft 365 includes several services that help manage user accounts. Which of the following is used to manage user accounts?

Which of the following services is used to manage user accounts?

Which of the following services is used to manage user accounts?

- A. Azure Active Directory
- B. Microsoft Entra ID
- C. Microsoft 365 Admin Center
- D. Microsoft 365 Security Center

Answer: C (LEAVE A REPLY)

NEW QUESTION: 34

Which Microsoft 365 service is used to manage user accounts?

Microsoft 365 includes several services that help manage user accounts. Which of the following is used to manage user accounts?

Which of the following services is used to manage user accounts?

Which of the following services is used to manage user accounts?

- A. Azure Active Directory
- B. Microsoft Entra ID
- C. Microsoft 365 Admin Center
- D. Microsoft 365 Security Center

Answer: A,D (LEAVE A REPLY)

Power Automate is the new name for Microsoft Flow.

NEW QUESTION: 35

Which Microsoft 365 service is used to manage user accounts?

Microsoft 365 includes several services that help manage user accounts. Which of the following is used to manage user accounts?

- A. Azure Active Directory
- B. Microsoft Entra ID
- C. Microsoft 365 Admin Center
- D. Microsoft 365 Security Center

Answer Area

Statements	Yes	No
Data Loss Prevention policies can prevent users from opening a document that contains sensitive information in SharePoint.	<input type="radio"/>	<input type="radio"/>
Data Loss Prevention policies can be configured to allow users to override a policy.	<input type="radio"/>	<input type="radio"/>
Data Loss Prevention policies can prevent users from sharing sensitive information in a Microsoft Teams channel or chat session.	<input type="radio"/>	<input type="radio"/>

Answer:

Answer Area

Statements	Yes	No
Data Loss Prevention policies can prevent users from opening a document that contains sensitive information in SharePoint.	<input checked="" type="radio"/>	<input type="radio"/>
Data Loss Prevention policies can be configured to allow users to override a policy.	<input checked="" type="radio"/>	<input type="radio"/>
Data Loss Prevention policies can prevent users from sharing sensitive information in a Microsoft Teams channel or chat session.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Answer Area

Statements	Yes	No
Data Loss Prevention policies can prevent users from opening a document that contains sensitive information in SharePoint.	<input checked="" type="radio"/>	<input type="radio"/>
Data Loss Prevention policies can be configured to allow users to override a policy.	<input checked="" type="radio"/>	<input type="radio"/>
Data Loss Prevention policies can prevent users from sharing sensitive information in a Microsoft Teams channel or chat session.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION: 36

Microsoft Azure AD is a cloud-based directory service that integrates with on-premises Active Directory (AD) DS (Active Directory Domain Services). It provides a secure and scalable environment for managing user identities and access to resources. Azure AD supports multi-factor authentication (MFA) and conditional access policies to enhance security. It also integrates with various Microsoft and third-party applications, providing a seamless user experience. Azure AD is a key component of Microsoft's cloud ecosystem, enabling organizations to securely manage their users and resources in the cloud.

Authentication sources	Client feature	Authentication sources
AD DS only	Log on to devices by using Windows Hello.	Authentication sources
Azure AD only	Log on to devices that are managed by Microsoft Intune.	Authentication sources
AD DS and Azure AD	Sign in to Outlook on the web by using multi-factor authentication.	Authentication sources

Answer:

Answer Area

Statements	Yes	No
Microsoft Defender for Endpoint detects advanced attacks and automates investigation and remediation of security incidents.	<input type="radio"/>	<input type="radio"/>
Microsoft Defender for Office 365 helps protect against malicious attachments and links that are sent through email.	<input type="radio"/>	<input type="radio"/>
Microsoft Defender for Cloud Apps provides client virtual private network (VPN) access to Microsoft 365 services.	<input type="radio"/>	<input type="radio"/>

Answer:

Statements	Yes	No
Microsoft Defender for Endpoint detects advanced attacks and automates investigation and remediation of security incidents.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Defender for Office 365 helps protect against malicious attachments and links that are sent through email.	<input checked="" type="radio"/>	<input type="radio"/>

- Tools**
- Azure Active Directory Identity Protection
 - Azure Advanced Threat Protection
 - Microsoft Exchange Online Protection
 - Office 365 Threat Intelligence

Answer Area Requirement

Use artificial intelligence to detect anomalies and suspicious incidents.	Tool
Identify and detect malicious insider actions to make it more difficult to compromise user credentials.	Tool
Protect against spam and help prevent messaging policy violations.	Tool
Scan emails and URLs to identify impersonation and malicious files.	Tool

Answer:

- Tools**
- Azure Active Directory Identity Protection
 - Azure Advanced Threat Protection
 - Microsoft Exchange Online Protection
 - Office 365 Threat Intelligence

Answer Area Requirement

Use artificial intelligence to detect anomalies and suspicious incidents.	Azure Active Directory Identity Protection
Identify and detect malicious insider actions to make it more difficult to compromise user credentials.	Azure Advanced Threat Protection
Protect against spam and help prevent messaging policy violations.	Microsoft Exchange Online Protection
Scan emails and URLs to identify impersonation and malicious files.	Office 365 Threat Intelligence

Explanation:

Requirement	Tool
Use artificial intelligence to detect anomalies and suspicious incidents.	Azure Active Directory Identity Protection
Identify and detect malicious insider actions to make it more difficult to compromise user credentials.	Azure Advanced Threat Protection
Protect against spam and help prevent messaging policy violations.	Microsoft Exchange Online Protection
Scan emails and URLs to identify impersonation and malicious files.	Office 365 Threat Intelligence

NEW QUESTION: 43

□□□ □□□ Microsoft Office 365 □□□□□□.

Requirement Microsoft

Service

Users must be able to use incompatible applications on a Windows 10 device.

	▼
Windows Virtual Desktop	
Azure AD Application Proxy	
Azure AD Connect	
Microsoft Intune	

Cloud-based application must use the same credentials as on-premises applications.

	▼
Windows Virtual Desktop	
Azure AD Application Proxy	
Azure AD Connect	
Microsoft Intune	

Users must be prevented from copying company data from managed applications installed on unmanaged devices.

	▼
Windows Virtual Desktop	
Azure AD Application Proxy	
Azure AD Connect	
Microsoft Intune

NEW QUESTION: 44

Microsoft is planning to migrate its applications to the cloud. The applications will be used by employees in various departments. The applications will be used on both on-premises and cloud-based devices. The applications will be used on both Windows and macOS devices. The applications will be used on both desktop and mobile devices. The applications will be used on both managed and unmanaged devices. The applications will be used on both managed and unmanaged devices.

Team	Requirement
Engineering	Application and operating system updates to devices must originate from an on-premises server.
Sales	Devices must be updated periodically and not require an on-premises server.
Finance	Devices must be updated periodically and monitored using one system.
Developers	Choose when updates are installed.

Microsoft is planning to migrate its applications to the cloud. The applications will be used by employees in various departments. The applications will be used on both on-premises and cloud-based devices. The applications will be used on both Windows and macOS devices. The applications will be used on both desktop and mobile devices. The applications will be used on both managed and unmanaged devices. The applications will be used on both managed and unmanaged devices.

Answer Area

Servicing models	Team	Servicing model
Windows Update (stand-alone)	Engineering	
Windows Update for Business	Sales	
Windows Server Update Services	Finance	
System Center Configuration Manager	App developers	

Answer:

Servicing models	Team	Servicing model
Windows Update (stand-alone)	Engineering	Windows Server Update Services
Windows Update for Business	Sales	Windows Update for Business
Windows Server Update Services	Finance	System Center Configuration Manager
System Center Configuration Manager	App developers	Windows Update (stand-alone)

Explanation:

NEW QUESTION: 48

Microsoft 365 provides service-level agreements (SLAs) that describe Microsoft's commitments for uptime and connectivity for its online services. The SLAs vary depending on the service and plan, but generally they offer a 99.9% monthly uptime guarantee. However, not every Microsoft 365 application has an individual SLA commitment. Some applications are grouped together under a single SLA, such as Office 365 apps (Word, Excel, PowerPoint, etc.), SharePoint Online, OneDrive for Business, etc. Other applications have their own separate SLAs, such as Dynamics 365 apps (Sales, Customer Service, Marketing, etc.), Azure Active Directory Premium P1/P2 plans, etc. Microsoft offers a service credit if the SLA is not upheld for Microsoft Online Services such as Azure, Dynamics 365, Office 365, and Intune. The service credit is prorated based on the service affected and the duration of the outage.

Answer:

Explanation:

NO:Microsoft 365 provides service-level agreements (SLAs) that describe Microsoft's commitments for uptime and connectivity for its online services. The SLAs vary depending on the service and plan, but generally they offer a 99.9% monthly uptime guarantee¹.

The SLA for Exchange Online, which is the email service in Microsoft 365, states that Microsoft will provide at least 99.9% availability of email delivery within one minute⁴. However, this is an average over a month and not for any one email message. If there is an average delay of greater than 10 minutes over a month, then Microsoft will consider it a breach of the SLA⁴.

NO:Microsoft 365 provides service-level agreements (SLAs) that describe Microsoft's commitments for uptime and connectivity for its online services. The SLAs vary depending on the service and plan, but generally they offer a 99.9% monthly uptime guarantee¹.

However, not every Microsoft 365 application has an individual SLA commitment. Some applications are grouped together under a single SLA, such as Office 365 apps (Word, Excel, PowerPoint, etc.), SharePoint Online, OneDrive for Business, etc.¹. Other applications have their own separate SLAs, such as Dynamics 365 apps (Sales, Customer Service, Marketing, etc.), Azure Active Directory Premium P1/P2 plans¹, etc.

YES:Microsoft offers a service credit if the SLA is not upheld for Microsoft Online Services such as Azure, Dynamics 365, Office 365, and Intune. The service credit is prorated based on the service affected and the duration of the outage¹.

NEW QUESTION: 49

Which of the following are valid methods for deploying an add-in to Microsoft Outlook?
 Select all that apply. (Select three.)

Statement	Yes	No
Use the Services & add-ins menu in the Microsoft 365 admin center to deploy the add-in.	<input type="radio"/>	<input type="radio"/>
Create a Microsoft Intune application policy to deploy the add-in.	<input type="radio"/>	<input type="radio"/>
Use Configuration Manager to deploy the add-in.	<input type="radio"/>	<input type="radio"/>

Answer:

Statement	Yes	No
Use the Services & add-ins menu in the Microsoft 365 admin center to deploy the add-in.	<input checked="" type="radio"/>	<input type="radio"/>
Create a Microsoft Intune application policy to deploy the add-in.	<input type="radio"/>	<input checked="" type="radio"/>

- Microsoft Azure virtual machines

NEW QUESTION: 60

Exchange Server Microsoft 365 Azure

B. Advanced Threat Protection

C.

D. 90

E. PIN

Answer: A,D,E ([LEAVE A REPLY](#))

You can manage many of the Microsoft 365 Business security features in the admin center, which gives you a simplified way to turn these features on or off. In the admin center, you can do the following:

Set application management settings for Android or iOS devices.

These settings include deleting files from an inactive device after a set period, encrypting work files, requiring that users set a PIN, and so on.

Set application protection settings for Windows 10 devices.

These settings can be applied to company data on both company-owned, or personally owned devices.

Set device protection settings for Windows 10 devices.

You can enable BitLocker encryption to help protect data in case a device is lost or stolen, and enable Windows Exploit Guard to provide advanced protection against ransomware.

Remove company data from devices.

You can remotely wipe company data if a device is lost, stolen, or an employee leaves your company.

Reset Windows 10 devices to their factory settings.

You can reset any Windows 10 devices that have device protection settings applied to them.

Statement	Yes	No
Secure Score in the Microsoft Defender portal supports recommendations for SharePoint Online.	<input type="radio"/>	<input type="radio"/>
Secure Score in the Microsoft Defender Portal helps organizations compare their score with other organizations.	<input type="radio"/>	<input type="radio"/>
Secure Score in the Microsoft Entra admin center supports recommendations for Exchange Online.	<input type="radio"/>	<input type="radio"/>

Answer:
Secure Score

Statement	Yes	No
Secure Score in the Microsoft Defender portal supports recommendations for SharePoint Online.	<input checked="" type="radio"/>	<input type="radio"/>
Secure Score in the Microsoft Defender Portal helps organizations compare their score with other organizations.	<input checked="" type="radio"/>	<input type="radio"/>
Secure Score in the Microsoft Entra admin center supports recommendations for Exchange Online.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Secure Score

Statement

Secure Score in the Microsoft Defender portal supports recommendations for SharePoint Online.

Yes

No

Secure Score in the Microsoft Defender Portal helps organizations compare their score with other organizations.

Secure Score in the Microsoft Entra admin center supports recommendations for Exchange Online.

NEW QUESTION: 66

Microsoft 365 Briefing emails in Microsoft Outlook and the MyAnalytics dashboard are all features of Microsoft Viva Insights.

Answer Area

Briefing emails in Microsoft Outlook and the MyAnalytics dashboard are all features of Microsoft Viva Insights.

Viva Insights

- Viva Connections
- Viva Insights
- Viva Learning
- Viva Topics

Answer:

Answer Area

Briefing emails in Microsoft Outlook and the MyAnalytics dashboard are all features of Microsoft Viva Insights.

Viva Insights

- Viva Connections
- Viva Insights
- Viva Learning
- Viva Topics

Explanation:

Answer Area

Briefing emails in Microsoft Outlook and the MyAnalytics dashboard are all features of Microsoft Viva Insights.

Viva Insights

NEW QUESTION: 67

Microsoft 365 Briefing emails in Microsoft Outlook and the MyAnalytics dashboard are all features of Microsoft Viva Insights.

- A. Viva Insights
- B. Viva Connections
- C. Viva Learning

D. □□ □□

Answer: D ([LEAVE A REPLY](#))

Principles	Requirement	Principle
Verify explicitly	Monitor all access requests to confirm the context of each access request.	<input type="text"/>
Least privileged access	Only grant users the environment and device permissions necessary to meet required business goals.	<input type="text"/>
Assume breach	Monitor, analyze, and automate response to security incidents.	<input type="text"/>
Threat protection		

Answer:

Principles

- Verify explicitly
- Least privileged access
- Assume breach
- Threat protection

Answer Area

Requirement

Monitor all access requests to confirm the context of each access request.

Only grant users the environment and device permissions necessary to meet required business goals.

Monitor, analyze, and automate response to security incidents.

Principle

- Verify explicitly
- Least privileged access
- Assume breach

Explanation:

Principles

- Verify explicitly
- Least privileged access
- Assume breach
- Threat protection

Answer Area

Requirement

Monitor all access requests to confirm the context of each access request.

Only grant users the environment and device permissions necessary to meet required business goals.

Monitor, analyze, and automate response to security incidents.

Principle

- Verify explicitly
- Least privileged access
- Assume breach

NEW QUESTION: 80

Which of the following are Microsoft 365 cloud services? (Select all that apply.)

Terms	Definition	Term
Windows Insider previews	Early build that are released to the public during the feature-development phase	
Servicing channels	A method for controlling the frequency at which organizations deploy Windows 10 features	
Deployment rings	A method of gradually deploying Windows 10 features by using multiple sets of targeted devices	

Answer:

Terms	Definition	Term
Windows Insider previews	Early build that are released to the public during the feature-development phase	Windows Insider previews
Servicing channels	A method for controlling the frequency at which organizations deploy Windows 10 features	Servicing channels
Deployment rings	A method of gradually deploying Windows 10 features by using multiple sets of targeted devices	Deployment rings

Explanation:

Definition	Term
Early build that are released to the public during the feature-development phase	Windows Insider previews
A method for controlling the frequency at which organizations deploy Windows 10 features	Servicing channels
A method of gradually deploying Windows 10 features by using multiple sets of targeted devices	Deployment rings

Cloud services	Requirement	Cloud service
Infrastructure as a service (IaaS)	Use Microsoft Outlook on the web.	Cloud service
Software as a service (SaaS)	Test Microsoft Insider Preview Branch versions of Windows software.	Cloud service
Windows as a service (WaaS)	Deploy virtual machines quickly.	Cloud service

Answer:

Cloud services	Answer Area	Requirement	Cloud service
Infrastructure as a service (IaaS)		Use Microsoft Outlook on the web.	Software as a service (SaaS)
Software as a service (SaaS)		Test Microsoft Insider Preview Branch versions of Windows software.	Windows as a service (WaaS)
Windows as a service (WaaS)		Deploy virtual machines quickly.	Infrastructure as a service (IaaS)

Explanation:

Requirement	Cloud service
Use Microsoft Outlook on the web.	Software as a service (SaaS)
Test Microsoft Insider Preview Branch versions of Windows software.	Windows as a service (WaaS)
Deploy virtual machines quickly.	Infrastructure as a service (IaaS)

NEW QUESTION: 105

App1 is a web application that uses Azure Storage. App1 must be able to access storage.

* App1 must be able to access storage.

* App1 must be able to access storage.

Azure AD (Azure Active Directory) ID must be used.

App1 must be able to access storage. App1 must be able to access storage.

App1 must be able to access storage. App1 must be able to access storage.

App1 must be able to access storage. App1 must be able to access storage.

App1 must be able to access storage. App1 must be able to access storage.

Identity solutions	Answer Area	Requirement	Identity solution
User-assigned managed identity		App1 identity to access storage	
System-assigned managed identity		Social media identity to access App1	
Azure AD business to business (B2B) identity			
Azure AD business to customer (B2C) identity			

Answer:

Identity solutions	Answer Area	Requirement	Identity solution
User-assigned managed identity		App1 identity to access storage	System-assigned managed identity
System-assigned managed identity		Social media identity to access App1	Azure AD business to customer (B2C) identity
Azure AD business to business (B2B) identity			
Azure AD business to customer (B2C) identity			

Explanation:

Answer Area	Microsoft	Statements	Yes	No
		Microsoft 365 Defender for Endpoint can block malware on Windows 10 devices.	<input type="checkbox"/>	<input type="radio"/>
		Microsoft 365 Defender for Office 365 is a solution that can detect malicious emails.	<input type="checkbox"/>	<input type="radio"/>
		Microsoft 365 Defender for Endpoint requires a separate installation for Windows 10 devices.	<input type="checkbox"/>	<input type="radio"/>

Explanation:

Microsoft 365

Statements	Yes	No
Microsoft 365 Defender for Endpoint can block malware on Windows 10 devices.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Defender for Office 365 is a solution that can detect malicious emails.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Defender for Endpoint requires a separate installation for Windows 10 devices.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION: 108

Microsoft Information Protection (MIP) is a set of features.

It allows you to protect sensitive information in your organization's data. It can be used to protect data in Microsoft 365, on-premises servers, and mobile devices.

Which of the following statements are true?

Statements	Yes	No
You can use sensitivity labels to allow users in another organization to review the content of an encrypted email for a specified number of days.	<input type="checkbox"/>	<input type="checkbox"/>
You can use sensitivity labels to add a watermark to the body of an email.	<input type="checkbox"/>	<input type="checkbox"/>
You can use sensitivity labels to protect content in Microsoft Teams sites, Microsoft 365 groups, and SharePoint sites.	<input type="checkbox"/>	<input type="checkbox"/>

Answer:

Statements	Yes	No
You can use sensitivity labels to allow users in another organization to review the content of an encrypted email for a specified number of days.	<input type="checkbox"/>	<input type="checkbox"/>
You can use sensitivity labels to add a watermark to the body of an email.	<input type="checkbox"/>	<input type="checkbox"/>
You can use sensitivity labels to protect content in Microsoft Teams sites, Microsoft 365 groups, and SharePoint sites.	<input type="checkbox"/>	<input type="checkbox"/>

Explanation:

Statements

Yes

No

You can use sensitivity labels to allow users in another organization to review the content of an encrypted email for a specified number of days.

You can use sensitivity labels to add a watermark to the body of an email.

You can use sensitivity labels to protect content in Microsoft Teams sites, Microsoft 365 groups, and SharePoint sites.

NEW QUESTION: 109

Microsoft 365

Microsoft Planner is available as an app in Microsoft Teams.

Microsoft Planner tasks can be added to Microsoft Outlook calendar.

Microsoft Planner can be integrated with FindTime.

Answer Area

Statements

Yes

No

Microsoft Planner is available as an app in Microsoft Teams.

Microsoft Planner tasks can be added to Microsoft Outlook calendar.

Microsoft Planner can be integrated with FindTime.

Answer:

Answer Area

Statements

Yes

No

Microsoft Planner is available as an app in Microsoft Teams.

Microsoft Planner tasks can be added to Microsoft Outlook calendar.

Microsoft Planner can be integrated with FindTime.

Explanation:

Answer Area

Statements

Yes

No

Microsoft Planner is available as an app in Microsoft Teams.

Microsoft Planner tasks can be added to Microsoft Outlook calendar.

Microsoft Planner can be integrated with FindTime.

NEW QUESTION: 110

WaaS(Windows as a Service)

Microsoft 365

Microsoft Planner is available as an app in Microsoft Teams.

Answer Area

The company will validate quality updates in an early release prior to a combined security release through

- B releases
- Non-security releases
- C releases
- Out-of-band (OOB) releases

Answer:

Answer Area

The company will validate quality updates in an early release prior to a combined security release through

- B releases
- Non-security releases
- C releases
- Out-of-band (OOB) releases

Explanation:

Answer Area

The company will validate quality updates in an early release prior to a combined security release through

NEW QUESTION: 111

Which of the following is an example of a private cloud solution?

Options:

- Running virtual machines on server hardware deployed in a datacenter that is maintained by your company
- Using Azure Backup to back up virtual machines on server hardware your company maintains
- Running Azure Virtual Desktop

Answer Area

Statements	Yes	No
Running virtual machines on server hardware deployed in a datacenter that is maintained by your company is an example of a private cloud solution.	<input type="radio"/>	<input type="radio"/>
Using Azure Backup to back up virtual machines on server hardware your company maintains is an example of a private cloud solution.	<input type="radio"/>	<input type="radio"/>
Running Azure Virtual Desktop is an example of a public cloud solution.	<input type="radio"/>	<input type="radio"/>

Answer:

Answer Area

Statements	Yes	No
Running virtual machines on server hardware deployed in a datacenter that is maintained by your company is an example of a private cloud solution.	<input checked="" type="radio"/>	<input type="radio"/>
Using Azure Backup to back up virtual machines on server hardware your company maintains is an example of a private cloud solution.	<input type="radio"/>	<input checked="" type="radio"/>
Running Azure Virtual Desktop is an example of a public cloud solution.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Answer Area

Microsoft Statements

Running virtual machines on server hardware deployed in a datacenter that is maintained by your company is an example of a private cloud solution.

Yes

No

Using Azure Backup to back up virtual machines on server hardware your company maintains is an example of a private cloud solution.

Running Azure Virtual Desktop is an example of a public cloud solution.

NEW QUESTION: 112

Microsoft 365 (USL) licenses are available for new customers who have not previously purchased Microsoft products and services. Full USLs are for existing Microsoft customers who want to upgrade an existing Microsoft 365 service. Standalone add-on licenses have a different expiration date than other subscriptions in Microsoft 365.

Statement	Yes	No
From SA USLs are for new customers who have not previously purchased Microsoft products and services.	<input type="radio"/>	<input type="radio"/>
Full USLs are for existing Microsoft customers who want to upgrade an existing Microsoft 365 service.	<input type="radio"/>	<input type="radio"/>
Standalone add-on licenses have a different expiration date than other subscriptions in Microsoft 365.	<input type="radio"/>	<input type="radio"/>

Answer:

Statement	Yes	No
From SA USLs are for new customers who have not previously purchased Microsoft products and services.	<input type="radio"/>	<input checked="" type="radio"/>
Full USLs are for existing Microsoft customers who want to upgrade an existing Microsoft 365 service.	<input checked="" type="radio"/>	<input type="radio"/>
Standalone add-on licenses have a different expiration date than other subscriptions in Microsoft 365.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

No, Yes, No

"From SA USLs are for new customers who have not previously purchased Microsoft products and services."

* Answer: # No

* Explanation: From SA (From Software Assurance) USLs are intended for customers who already have existing Microsoft licenses covered by Software Assurance and want to transition to Microsoft 365.

They are not for entirely new customers.

* "Full USLs are for existing Microsoft customers who want to upgrade an existing Microsoft 365 service."

* Answer: # Yes

* Explanation: Full User Subscription Licenses (Full USLs) are required for customers who do not have any prior qualifying licenses and need a complete Microsoft 365 subscription.

* "Standalone add-on licenses have a different expiration date than other subscriptions in Microsoft 365."

* Answer: # No

* Explanation: Microsoft 365 standalone add-on licenses typically align with the base subscription's expiration date. Their validity is linked to the primary subscription they are associated with.

Answer Area	Scenario	Feature
Microsoft Office 365 Secure Score	Provide recommendations to reduce risk.	
Customer Lockbox	Control how a Microsoft support engineer accesses data during a help session.	
Microsoft Office 365 Advanced Threat Protection	Protect against unknown malware viruses, and malicious URLs.	
Data Loss Prevention	Identify sensitive data and create policies that help prevent users from accidentally or intentionally sharing the data.	

Answer:

Answer Area	Scenario	Feature
Microsoft Office 365 Secure Score	Provide recommendations to reduce risk.	Microsoft Office 365 Secure Score
Customer Lockbox	Control how a Microsoft support engineer accesses data during a help session.	Customer Lockbox
Microsoft Office 365 Advanced Threat Protection	Protect against unknown malware viruses, and malicious URLs.	Microsoft Office 365 Advanced Threat Protection
Data Loss Prevention	Identify sensitive data and create policies that help prevent users from accidentally or intentionally sharing the data.	Data Loss Prevention

Explanation:

Scenario	Feature
Provide recommendations to reduce risk.	Microsoft Office 365 Secure Score
Control how a Microsoft support engineer accesses data during a help session.	Customer Lockbox
Protect against unknown malware viruses, and malicious URLs.	Microsoft Office 365 Advanced Threat Protection
Identify sensitive data and create policies that help prevent users from accidentally or intentionally sharing the data.	Data Loss Prevention

NEW QUESTION: 115

Which Microsoft 365 feature provides recommendations to reduce risk?
Which Microsoft 365 feature controls how a Microsoft support engineer accesses data during a help session?
Which Microsoft 365 feature protects against unknown malware viruses, and malicious URLs?
Which Microsoft 365 feature identifies sensitive data and creates policies that help prevent users from accidentally or intentionally sharing the data?
Answer: A, B, C, D

- A. Office 365 Secure Score
- B. Office 365 Customer Lockbox
- C. Office 365 Advanced Threat Protection
- D. Office 365 Data Loss Prevention

Answer: A,B (LEAVE A REPLY)

Feature	Supported environments
Exchange Web Services (EWS) access to accounts	Exchange Server and Exchange Online

NEW QUESTION: 133

Cloud providers help to improve business continuity by offering built-in, one-click backup and recovery capabilities. Some providers also offer the ability to store backups in different geographic regions.

When demand spikes or the organization needs more powerful compute resources, organizations can alter their resources instantly on demand.

There are significant savings in resource, maintenance, and real estate costs, in addition to the ability to optimize workloads so that they cost less to run.

A. Cloud providers help to improve business continuity by offering built-in, one-click backup and recovery capabilities.

B. Some providers also offer the ability to store backups in different geographic regions.

C. When demand spikes or the organization needs more powerful compute resources, organizations can alter their resources instantly on demand.

D. There are significant savings in resource, maintenance, and real estate costs, in addition to the ability to optimize workloads so that they cost less to run.

E. Cloud providers help to improve business continuity by offering built-in, one-click backup and recovery capabilities.

Answer: C,D,E (LEAVE A REPLY)

C: Most cloud providers help to improve business continuity by offering built-in, one-click backup and recovery capabilities. Some providers also offer the ability to store backups in different geographic regions.

D: When demand spikes or the organization needs more powerful compute resources, organizations can alter their resources instantly on demand.

E: There are significant savings in resource, maintenance, and real estate costs, in addition to the ability to optimize workloads so that they cost less to run.

- A. It can manage on-premises servers.
 - B. It can manage mobile devices.
 - C. It can manage Windows devices.
 - D. It can manage on-premises services.
 - E. It can manage on-premises applications.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 156

Which of the following is a benefit of cloud applications?

Statement	Yes	No
Adopting cloud applications reduces the number of on-premises servers and services to manage.	<input type="radio"/>	<input type="radio"/>
For remote users, accessing applications stored in the cloud is easier than accessing applications stored on a company network.	<input type="radio"/>	<input type="radio"/>
A loss of internet connectivity will not significantly impact functionality for users accessing applications and services in the cloud.	<input type="radio"/>	<input type="radio"/>

Answer:

Statement

Microsoft

Yes

No

Adopting cloud applications reduces the number of on-premises servers and services to manage.

For remote users, accessing applications stored in the cloud is easier than accessing applications stored on a company network.

A loss of internet connectivity will not significantly impact functionality for users accessing applications and services in the cloud.

Explanation:

Statement

Microsoft

Yes

No

Adopting cloud applications reduces the number of on-premises servers and services to manage.

For remote users, accessing applications stored in the cloud is easier than accessing applications stored on a company network.

A loss of internet connectivity will not significantly impact functionality for users accessing applications and services in the cloud.

NEW QUESTION: 157

Q: Which of the following are true? (Select all that apply.)
A: Microsoft Cloud App Security can integrate with multiple clouds.
Microsoft Cloud App Security can be used to assess the regulatory compliance of cloud apps.
Microsoft Cloud App Security can provide behavioral analytics and anomaly detection.

Statements

Microsoft

Yes

No

Microsoft Cloud App Security can integrate with multiple clouds

Microsoft Cloud App Security can be used to assess the regulatory compliance of cloud apps

Microsoft Cloud App Security can provide behavioral analytics and anomaly detection

Answer:

Statements

Yes

No

Microsoft Cloud App Security can integrate with multiple clouds

Microsoft Cloud App Security can be used to assess the regulatory compliance of cloud apps

Microsoft Cloud App Security can provide behavioral analytics and anomaly detection

Microsoft

Explanation:

NEW QUESTION: 171

Which cloud model is required to meet the following requirements?
1. Provide an on-demand sandbox environment.

2. Provide failover capabilities between local resources that you manage and resources in other regions.

3. Deploy virtual machines that use proprietary peripheral devices.

Options: Private, Public, Hybrid

Answer: Public

Explanation: The Public cloud model is required to meet the following requirements:

Cloud models	Requirement	Cloud model
Private	Provide an on-demand sandbox environment.	<input type="checkbox"/>
Public	Provide failover capabilities between local resources that you manage and resources in other regions.	<input type="checkbox"/>
Hybrid	Deploy virtual machines that use proprietary peripheral devices.	<input type="checkbox"/>

Answer:

Cloud models	Requirement	Cloud model
Private	Provide an on-demand sandbox environment.	Public
Public	Provide failover capabilities between local resources that you manage and resources in other regions.	Hybrid
Hybrid	Deploy virtual machines that use proprietary peripheral devices.	Private

Explanation:

Requirement	Cloud model
Provide an on-demand sandbox environment.	Public
Provide failover capabilities between local resources that you manage and resources in other regions.	Hybrid
Deploy virtual machines that use proprietary peripheral devices.	Private
