NEW QUESTION: 86

Which Microsoft 365 feature can be used to protect sensitive information in email messages? Select three correct answers.

Options: A. DKIM (DomainKeys Identified Mail) B. Microsoft Defender for Office 365 C. Outlook S/MIME (Secure/Multipurpose Internet Mail Extensions) D. Microsoft Defender for Cloud E. Microsoft Defender for Endpoint

- A. DKIM(DomainKeys Identified Mail) is a protocol for authenticating email messages.
- B. Microsoft Defender for Office 365 is a cloud-based security solution that protects email messages in Microsoft 365.
- C. Outlook S/MIME (Secure/Multipurpose Internet Mail Extensions) is a protocol for encrypting and signing email messages.
- D. Microsoft Defender for Cloud is a cloud-based security solution that protects Azure resources.
- E. Microsoft Defender for Endpoint is a cloud-based security solution that protects endpoints.

Answer: B,E (LEAVE A REPLY)

Explanation: Microsoft 365 features that can be used to protect sensitive information in email messages are Microsoft Defender for Office 365 and Outlook S/MIME. Microsoft Defender for Office 365 is a cloud-based security solution that protects email messages in Microsoft 365. Outlook S/MIME is a protocol for encrypting and signing email messages. DKIM is a protocol for authenticating email messages. Microsoft Defender for Cloud is a cloud-based security solution that protects Azure resources. Microsoft Defender for Endpoint is a cloud-based security solution that protects endpoints.

NEW QUESTION: 121

Microsoft 365 is a collection of cloud-based services that enable organizations to work more effectively. Microsoft 365 includes a variety of services, including Microsoft Teams, OneDrive for Business, SharePoint Online, Microsoft Yammer, and Office 365 ProPlus. These services are designed to help organizations collaborate, share information, and manage their data. Microsoft 365 is a cloud-based service that enables you to store and protect files, share files with others, access files from anywhere on all devices, and restore files to an earlier date. A service that enables you to store, organize, share, add third-party apps, and access information from almost any device by using a web browser. A private social network that you can use to efficiently resolve support issues and gather feedback on projects and documents.

Services	Descriptions	Service
Microsoft Teams	A chat based workspace that facilitates real-time collaboration and enables members of an organization to have conversations and create work plans.	Service
OneDrive for Business		
SharePoint Online	A cloud service that enables you to store and protect files, share files with others, access files from anywhere on all devices, and restore files to an earlier date.	Service
Microsoft Yammer		
Office 365 ProPlus	A service that enables you to store, organize, share, add thord-party apps, and access information from all,ost any device by using a web browser.	Service
	 A private social network that you can use to efficently resolve support issues and gather feedback on projects and documents.	Service

Answer:

Services	Descriptions	Service
Microsoft Teams	A chat based workspace that facilitates real-time collaboration and enables members of an organization to have conversations and create work plans.	Microsoft Teams
OneDrive for Business	A cloud service that enables you to store and protect files, share files with others, access files from anywhere on all devices, and restore files to an earlier date.	OneDrive for Business
SharePoint Online	A service that enables you to store, organize, share, add third-party apps, and access information from all,ost any device by using a web browser.	SharePoint Online
Microsoft Yammer	A private social network that you can use to effciently resolve support issues and gather feedback on projects and documents.	Microsoft Yammer
Office 365 ProPlus

NEW QUESTION: 144

Which of the following are Microsoft Office 365 cloud services?
Select all that apply. (2 correct answers.)
A. Microsoft Skype
B. Microsoft Teams
C. Microsoft OneDrive
D. Microsoft Exchange

Answer: A,C (LEAVE A REPLY)

URL: <https://docs.microsoft.com/en-us/office365/enterprise/architecture-of-microsoft-hybrid-cloud-scenarios>

NEW QUESTION: 145

Which of the following are Microsoft Office 365 cloud services?
Select all that apply.
* Microsoft Skype
* Microsoft Teams
* Microsoft OneDrive
* Microsoft Exchange
URL: <https://docs.microsoft.com/en-us/office365/enterprise/architecture-of-microsoft-hybrid-cloud-scenarios>

Requirement	Action
Classify documents	Publish labels. Define file and folder structures. Apply Microsoft SharePoint permissions.
Ensure that classifications are enforced.	Apply supervision policies. Configure document approval Configure Microsoft Outlook Mail Tips.
Delete documents that are no longer used.	Apply retention policies. Apply preservation policies. Configure the Microsoft SharePoint second-stage recycle bin.

Answer:

Requirement	Action
Classify documents	▼ Publish labels. Define file and folder structures. Apply Microsoft SharePoint permissions.
Ensure that classifications are enforced.	▼ Apply supervision policies. Configure document approval Configure Microsoft Outlook Mail Tips.
Delete documents that are no longer used.	▼ Apply retention policies. Apply preservation policies. Configure the Microsoft SharePoint second-stage recycle bin.

□□

NEW QUESTION: 201

Microsoft 365 provides a set of cloud services that can be used to build a solution. The solution must meet the following requirements:

- Users must be able to chat, host meetings, and make calls with internal and external users.
- Users must be able to create posts, tag people and communities, and use social tagging.

Which cloud services should be recommended to meet these requirements?

Cloud services

Exchange Online

Microsoft Teams

Yammer

Microsoft Stream

Answer Area

Requirement

Users must be able to chat, host meetings, and make calls with internal and external users.

Users must be able to create posts, tag people and communities, and use social tagging.

Cloud service

Cloud service

Cloud service

Answer:

Cloud services

Exchange Online

Microsoft Teams

Yammer

Microsoft Stream

Answer Area

Requirement

Users must be able to chat, host meetings, and make calls with internal and external users.

Users must be able to create posts, tag people and communities, and use social tagging.

Cloud service

Microsoft Teams

Yammer

Requirement	Cloud service
Users must be able to chat, host meetings, and make calls with internal and external users.	Microsoft Teams
Users must be able to create posts, tag people and communities, and use social tagging.	Yammer
