NEW QUESTION: 1

You are developing a report page. Some users will navigate the report by using a keyboard, and some users will consume the report by using a screen reader. You need to ensure that the users can consume the content on a report page in a logical order .

What should you configure in Microsoft Power BI Desktop?

- A. the layer order
- B. the tab order
- C. the X position
- D. the bookmark order

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

HOTSPOT

You have a table that contains the following three columns:

- * City
- * Total Sales
- * Occupation

You need to create a key influencers visualization as shown in the exhibit. (Click the Exhibit tab.)

How should you configure the visualization? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 3

HOTSPOT

You have two Azure SQL databases that contain the same tables and columns.

For each database, you create a query that retrieves data from a table named Customers.

You need to combine the Customer tables into a single table. The solution must minimize the size of the data model and support scheduled refresh in powerbi.com.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 4

HOTSPOT

You need to calculate the last day of the month in the balance sheet data to ensure that you can relate the balance sheet data to the Date table .

Which type of calculation and which formula should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 5

What is the minimum number of datasets and storage modes required to support the reports?

- A. a single DirectQuery dataset
- B. two DirectQuery datasets
- C. a single imported dataset
- D. two imported datasets

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 6

You need to create a visualization that compares revenue and cost over time.

Which type of visualization should you use?

- A. line chart
- B. donut chart
- C. waterfall chart
- D. stacked area chart

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 7

You have an Azure SQL database that contains sales transactions. The database is updated frequently.

You need to generate reports from the data to detect fraudulent transactions. The data must be visible within five minutes of an update.

How should you configure the data connection?

- A. Set the Command timeout in minutes setting.
- B. Set Data Connectivity mode to DirectQuery.
- C. Add a SQL statement.
- D. Set Data Connectivity mode to Import.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 8

You have a Q&A visual that displays information from a table named Carriers as shown in the following exhibit.

You need to ensure that users can ask questions by using the term airline or carrier. The solution must minimize changes to the data model.

What should you do?

- A. Add airline as a synonym of carrier.
- B. Rename the query from Carriers to airlines.
- C. Rename the carrier column as airline in the Carriers query.
- D. Add a duplicate query named Airline.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

HOTSPOT

You have the Power BI data model shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 10

You have a report that contains four pages. Each page contains slicers for the same four fields.

Users report that when they select values on a slicer on one page, the visuals are not updated on all the pages. You need to recommend a solution to ensure that users can select a value once to filter the results on all the pages .

What are two possible recommendations to achieve this goal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Replace the slicers with visual-level filters.
- B. Replace the slicers with page-level filters.
- C. Replace the slicers with report-level filters.
- D. Sync the slicers across the pages.
- E. Create a bookmark for each slicer value.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 11

You have an Azure SQL database that contains sales transactions. The database is updated frequently.

You need to generate reports from the data to detect fraudulent transactions. The data must be visible within five minutes of an update.

How should you configure the data connection?

- A. Set Data Connectivity mode to DirectQuery.
- B. Add a SQL statement.
- C. Set the Command timeout in minutes setting.
- D. Set Data Connectivity mode to Import.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 12

You have a query that returns the data shown in the following exhibit.

You need to configure the query to display the data as shown in the following exhibit.

Which step should you use in the query?

- A. = Table.SplitColumn(Source, "classes". Splitter.SplitTextByPositions({10}), {"classes.1"})
- B. =Table.ExpandListColumn(Table.TransformColumnns(Source, {"classes". Splitter.SplitTextByDelimiter(", ", QuoteStyle.None), let itemType - (type nullable text) meta [Serialized.Text = true] in type {itemType}}), "classes")
- C. = Table.Unpivot(Source, {"classes"}, "Attribute", "Value")
- D. = Table.SplitColumn(Source, "classes". Splitter.SplitTextByDelimiterf",", QuoteStyle.None), {"classes.1"})

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 13

HOTSPOT

You are creating a quick measure as shown in the following exhibit.

You need to create a monthly rolling average measure for Sales over time.

How should you configure the quick measure calculation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 14

You have a Microsoft Power BI report. The size of PBIX file is 550 MB. The report is accessed by using an App workspace in shared capacity of powerbi.com.

The report uses an imported dataset that contains one fact table. The fact table contains 12 million rows. The dataset is scheduled to refresh twice a day at 08:00 and 17:00.

The report is a single page that contains 15 custom visuals and 10 default visuals.

Users say that the report is slow to load the visuals when they access and interact with the report

You need to recommend a solution to improve the performance of the report.

What should you recommend?

- A. Implement row-level security (RLS).
- B. Replace the default visuals with custom visuals.
- C. Split the visuals onto multiple pages.
- D. Increase the number of times that the dataset is refreshed.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 15

You have a Microsoft Power BI dashboard. The report used to create the dashboard uses an imported dataset from a Microsoft SQL Server data source.

The dashboard is shown in the exhibit. (Click the Exhibit tab.)

What occurred at 12:03:06 PM?

- A. A user pressed F5
- B. A new transaction was added to the data source.
- C. The dashboard tile cache refreshed.
- D. A user added a comment to a tile.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 16

You have a large dataset that contains more than 1 million rows. The table has a datetime column named Date.

You need to reduce the size of the data model.

What should you do?

- A. Trim the Date column.
- B. Round the hour of the Date column to startOfHour.
- C. Split the Date column into two columns, one that contains only the time and another that contains only the date.
- D. Change the data type of the Date column to Text.

NEW QUESTION: 17

You have multiple dashboards.

You need to ensure that when users browse the available dashboards from powerbi.com, they can see which dashboards contain Personally Identifiable Information (PII). The solution must minimize configuration effort and impact on the dashboard design.

What should you use?

- A. comments
- B. Active Directory groups
- C. tiles

D. Microsoft Information Protection sensitivity labels

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 18

Topic 2, Contoso Ltd, Case Study

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Existing Environment

Contoso, Ltd. is a manufacturing company that produces outdoor equipment. Contoso has quarterly board meetings for which financial analysts manually prepare Microsoft Excel reports, including profit and loss statements for each of the company's four business units, a company balance sheet, and net income projections for the next quarter.

Data and Sources

Data for the reports comes from three sources. Detailed revenue, cost and expense data comes from an Azure SQL database. Summary balance sheet data comes from Microsoft Dynamics 365 Business Central. The balance sheet data is not related to the profit and loss results, other than they both relate to dates.

Monthly revenue and expense projections for the next quarter come from a Microsoft SharePoint Online list. Quarterly projections relate to the profit and loss results by using the following shared dimensions: date, business unit, department, and product category.

Net Income Projection Data

Net income projection data is stored in a SharePoint Online list named Projections in the format shown in the following table.

Revenue projections are set at the monthly level and summed to show projections for the quarter.

Balance Sheet Data

The balance sheet data is imported with final balances for each account per month in the format shown in the following table.

There is always a row for each account for each month in the balance sheet data.

Dynamics 365 Business Central Data

Business Central contains a product catalog that shows how products roll up to product categories, which roll up to business units. Revenue data is provided at the date and product level. Expense data is provided at the date and department level.

Business Issues

Historically, it has taken two analysts a week to prepare the reports for the quarterly board meetings. Also, there is usually at least one issue each quarter where a value in a report is wrong because of a bad cell reference in an Excel formula. On occasion, there are conflicting results in the reports because the products and departments that roll up to each business unit are not defined consistently.

Planned Changes

Contoso plans to automate and standardize the quarterly reporting process by using Microsoft Power BI. The company wants to how long it takes to populate reports to less than two days. The company wants to create common logic for business units, products, and departments to be used across all reports, including, but not limited, to the quarterly reporting for the board.

Technical Requirements

Contoso wants the reports and datasets refreshed with minimal manual effort. The company wants to provide a single package of reports to the board that contains custom navigation and links to supplementary information.

Maintenance, including manually updating data and access, must be minimized as much as possible.

Security Requirements

The reports must be made available to the board from powerbi.com. A mail-enabled security group will be used to share information with the board.

The analysts responsible for each business unit must see all the data the board sees, except the profit and loss data, which must be restricted to only their business unit's data. The analysts must be able to build new reports from the dataset that contains the profit and loss data, but any reports that the analysts build must not be included in the quarterly reports for the board. The analysts must not be able to share the quarterly reports with anyone.

Report Requirements

You plan to relate the balance sheet to a standard date table in Power BI in a many-to-one relationship based on the last day of the month. At least one of the balance sheet reports in the quarterly reporting package must show the ending balances for the quarter, as well as for the previous quarter.

Projections must contain a column named RevenueProjection that contains the revenue projection amounts.

A relationship must be created from Projections to a table named Date that contains the columns shown in the following table.

The relationships between products and departments to business units must be consistent across all reports.

The board must be able to get the following information from the quarterly reports:

- * Revenue trends over time
- * Ending balances for each account
- * A comparison of expenses versus projections by quarter
- * Changes in long-term liabilities from the previous quarter
- * A comparison of quarterly revenue versus the same quarter during the prior year

Which two types of visualizations can be used in the balance sheet reports to meet the reporting goals? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A.** a line chart that shows balances by quarter filtered to account categories that are long-term liabilities.
- B.** a clustered column chart that shows balances by date (x-axis) and account category (legend) without filters.
- C.** a ribbon chart that shows balances by quarter and accounts in the legend.
- D.** a pie chart that shows balances by account category without filters.
- E.** a clustered column chart that shows balances by quarter filtered to account categories that are long-term liabilities.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 19

You build a report to analyze customer transactions from a database that contains the tables shown in the following table.

You import the tables.

Which relationship should you use to link the tables?

- A.** many-to-many between Customer and Transaction
- B.** one-to-one between Customer and Transaction
- C.** one-to-many from Transaction to Customer
- D.** one-to-many from Customer to Transaction

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 20

HOTSPOT

You have a Power BI report.

You need to create a calculated table to return the 100 highest spending customers.

How should you complete the DAX expression? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 21**DRAG DROP**

You are modeling data in table named SalesDetail by using Microsoft Power BI.

You need to provide end users with access to the summary statistics about the SalesDetail data.

The users require insights on the completeness of the data and the value distributions.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

NEW QUESTION: 22

You have the visual shown in the Original exhibit. {Click the Original tab.}

You need to configure the visual as shown in the Modified exhibit. (Click the Modified tab.)

What should you add to the visual?

- A. a measure
- B. an Average line
- C. a forecast
- D. a trendline

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 23

You plan to create the chart shown in the following exhibit.

How should you create the dashed horizontal line denoting the 40th percentile of daily sales for the period shown?

- A. Add a measure to the visual that uses the following DAX expression. `Heasurel = PERCENTILEX.INC (Sales,Sales[Total Sales],6.40)`
- B. Add a measure to the visual that uses the following DAX expression. `Heasurel - PERCENTUEX.EXC (Sales,Sales[Total Sales],6.40)`
- C. Create a horizontal line that has a fixed value of 24,000.
- D. Add a new percentile line that uses Total Sales as the measure and 40% as the percentile.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 24

You have a Power BI tenant.

You have reports that use financial datasets and are exported as PDF files.

You need to ensure that the reports are encrypted.

What should you implement?

- A. dataset certifications
- B. Microsoft Intune policies
- C. sensitivity labels
- D. row-level security (RLS)

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 25

HOTSPOT

You are creating an analytics report that will consume data from the tables shown in the following table.

There is a relationship between the tables.

There are no reporting requirements on employeejd and employee_photo.

You need to optimize the data model

What should you configure for employeejd and employee.photo? To answer, select the appropriate options in the answer area.

Answer:

NEW QUESTION: 26

Your company has employees in 10 states.

The company recently decided to associate each state to one of the following three regions: East, West, and North.

You have a data model that contains employee information by state. The model does NOT include region information.

You have a report that shows the employees by state.

You need to view the employees by region as quickly as possible.

What should you do?

- A.** Create a new group on the state column and set the Group type to List.
- B.** Create a new aggregation that summarizes by state.
- C.** Create a new aggregation that summarizes by employee.
- D.** Create a new group on the state column and set the Group type to Bin.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 27

You have a collection of reports for the HR department of your company.

You need to create a visualization for the HR department that shows a historic employee counts and predicts trends during the next six months.

Which type of visualization should you use?

- A.** ribbon chart
- B.** scatter chart
- C.** line chart
- D.** key influences

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 28

You have a table that contains sales data and approximately 1,000 rows.

You need to identify outliers in the table .

Which type of visualization should you use?

- A. donut chart
- B. area chart
- C. pie chart
- D. scatter plot

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 29

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You create a parameter named DataSourceExcel that holds the file name and location of a Microsoft Excel data source.

You need to update the query to reference the parameter instead of multiple hard-coded copies of the location within each query definition.

Solution: You add a Power Apps custom visual to the report.

Does this meet the goal?

- A. No
- B. Yes

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 30

DRAG DROP

You are using existing reports to build a dashboard that will be viewed frequently in portrait mode on mobile phones.

You need to build the dashboard.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

NEW QUESTION: 31

Which DAX expression should you use to get the ending balances in the balance sheet reports?

- A. CALCULATE (SUM(BalanceSheet [BalanceAmount]), LASTDATE('Date'[Date]))
- B. CALCULATE (SUM(BalanceSheet [BalanceAmount]), DATESQTD('Date'[Date]))
- C. FIRSTNONBLANK ('Date' [Date] SUM(BalanceSheet[BalanceAmount]))
- D. CALCULATE (MAX(BalanceSheet[BalanceAmount]), LASTDATE('Date' [Date]))

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 32

HOTSPOT

You need to create a visualization to meet the reporting requirements of the sales managers. How should you create the visualization? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 33

You publish a report to a workspace named Customer Services. The report identifies customers that have potential data quality issues that must be investigated by the customer services department of your company.

You need to ensure that customer service managers can create task lists in Microsoft Excel based on the data.

Which report setting should you configure?

- A. Change default visual interaction from cross highlighting to cross filtering.
- B. Allow users to add comments to this report.
- C. Don't allow end user to save filters on this report.
- D. Enable the updated filter pane, and show filters in the visual header for this report.
- E. Choose the type of data you allow your end users to export.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 34

DRAG DROP

You are building a dataset from a JSON file that contains an array of documents.

You need to import attributes as columns from all the documents in the JSON file. The solution must ensure that date attributes can be used as date hierarchies in Microsoft Power BI reports. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

NEW QUESTION: 35

You are configuring a Microsoft Power BI data model to enable users to ask natural language questions by using Q&A. You have a table named Customer that has the following measure.

Customer Count = DISTINCTCOUNT(Customer[CustomerID])

Users frequently refer to customers as subscribers.

You need to ensure that the users can get a useful result for "subscriber count" by using Q&A.

The solution must minimize the size of the model.

What should you do?

- A. Add a description of "Subscriber" to the Customer table.
- B. Set Summarize By to None for the CustomerID column.
- C. Add a description of "subscriber count" to the Customer Count measure.
- D. Add a synonym of "subscriber" to the Customer table.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 36

You build a report to help the sales team understand its performance and the drivers of sales.

The team needs to have a single visualization to identify which factors affect success .

Which type of visualization should you use?

- A. Key influences
- B. Funnel chart
- C. Q&A
- D. Line and clustered column chart

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 37

DRAG DROP

You have a Microsoft Power BI workspace.

You need to grant the user capabilities shown in the following table.

The solution must use the principle of least privilege.

Which user role should you assign to each user? To answer, drag the appropriate roles to the correct users. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 38

You have the visual shown in the exhibit. (Click the Exhibit tab.)

You need to show the relationship between Total Cost and Total Sales over time.

What should you do?

- A. Add a play axis.
- B. From the Analytics pane, add an Average line.
- C. Create a DAX measure that calculates year-over-year growth.
- D. Add a slicer for the year.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 39

You have a prospective customer list that contains 1,500 rows of data.

The list contains the following fields:

- * First name
- * Last name
- * Email address
- * State/Region
- * Phone number

You import the list into Power Query Editor.

You need to ensure that the list contains records for each State/Region to which you want to target a marketing campaign.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Open the Advanced Editor.
- B. Select Column quality.
- C. Select Column profile.
- D. Enable Column profiling based on entire dataset.
- E. Select Column distribution.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 40

You have a report that contains a bar chart and a column chart. The bar chart shows customer count by customer segment. The column chart shows sales by month.

You need to ensure that when a segment is selected in the bar chart, you see which portion of the total sales for the month belongs to the customer segment.

How should the visual interactions be set on the column chart when the bar chart is selected?

- A. highlight
- B. filter
- C. no impact

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 41

Your company plans to completely separate development and production assets such as datasets, reports, and dashboards in Microsoft Power BI.

You need to recommend an application lifecycle strategy. The solution must minimize maintenance to update access and prevent end users from viewing the development assets.

What should you recommend?

- A. Create production reports in a separate workspace that uses a shared dataset from the development workspace. Grant the end users access to the production workspace.

- B.** In the same workspace, create separate copies of the assets and append DEV to the names of the copied assets. Grant the end users access to the workspace.
- C.** Create one workspace for development. From the workspace, publish an app for production.
- D.** Create separate workspaces for development and production. Grant the end users access to the production workspace.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 42

What should you create to meet the reporting requirements of the sales department?

- A.** a measure that uses a formula of COUNTROWS (Sales)
- B.** a measure that uses a formula of SUM (Sales [sales_id])
- C.** a calculated column that use a formula of COUNTA(sales [sales_id])
- D.** a calculated column that uses a formula of SUM (Sales [sales_id])

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 43

DRAG DROP

You build a report about warehouse inventory data. The dataset has more than 10 million product records from 200 warehouses worldwide.

You have a table named Products that contains the columns shown in the following table.

Warehouse managers report that it is difficult to use the report because the report uses only the product name in tables and visuals. The product name is contained within the ProductDescription column and is always the fourth value.

You need to modify the report to support the warehouse managers requirement to explore inventory levels at different levels of the product hierarchy. The solution must minimize the model size.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

NEW QUESTION: 44

Your company has training videos that are published to Microsoft Stream.

You need to surface the videos directly in a Microsoft Power BI dashboard.

Which type of tile should you add?

- A.** web content
- B.** custom streaming data
- C.** video
- D.** text box

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 45

A. Configure the Sales Profit measure to use the RANKX function.

B. Add a calculated column to the table that returns the city name if the city is in the top 10, otherwise the calculated column will return "Not in Top 10". In the visual, replace Sales Profit with the calculated column.

C. Add a calculated column to the table that uses the TOPN function. In the visual, replace Sales Profit with the calculated column.

D. Add a Top N filter to the visual.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 48

DRAG DROP

You have a Microsoft Power BI data model that contains three tables named Sales, Product, and Date.

The Sales table has an existing measure named [Total Sales] that sums the total sales from the Sales table.

You need to write a calculation that returns the percentage of total sales that a selected ProductCategoryName value represents. The calculation must respect any slicers on ProductCategoryName and must show the percentage of visible total sales. For example, if there are four ProductCategoryName values, and a user filters one out, a table showing ProductCategoryName and the calculation must sum up to 100 percent.

How should you complete the calculation? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION: 49

Your company plans to completely separate development and production assets such as datasets, reports, and dashboards in Microsoft Power BI.

You need to recommend an application lifecycle strategy. The solution must minimize access to production assets and prevent end users from viewing the development assets.

What should you recommend?

A. In one workspace, create separate copies of the assets and append DEV to the names of the copied assets. Grant the end users access to the workspace.

B. Create a workspace for development and a workspace for production. From the production workspace, publish an app.

C. Create production reports in a separate workspace that uses a shared dataset from the development workspace. Grant the end users access to the production workspace.

D. Create one workspace for development. From the new workspace, publish an app for production.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 50

You have multiple dashboards.

You need to ensure that when users browse the available dashboards from powerbi.com. they can see which dashboards contain Personally Identifiable Information (PII). The solution must minimize configuration effort and impact on the dashboard design.

What should you use?

- A. Active Directory groups
- B. tiles
- C. data classifications
- D. comments
