NEW QUESTION: 224

Which of the following is a key benefit of Agile project management?

Agile project management is a framework for managing and completing projects using flexible processes. It is an iterative approach that allows for frequent releases and the ability to respond to changes in requirements. Agile project management is based on the principles of self-organizing teams, frequent communication, and frequent releases. Agile project management is a framework for managing and completing projects using flexible processes. It is an iterative approach that allows for frequent releases and the ability to respond to changes in requirements. Agile project management is based on the principles of self-organizing teams, frequent communication, and frequent releases.

- A. Increased predictability of project outcomes.
