NEW QUESTION: 15

Which Palo Alto Networks feature can be used to detect and prevent data exfiltration from a network?

- A. Data Loss Prevention
- B. Network Access Control
- C. Content Inspection
- D. XDR

Answer: (SHOW ANSWER)

Answer: A

"Palo Alto Networks AutoFocus is a cloud-based threat intelligence platform that provides real-time visibility into the threat landscape. It uses machine learning and behavioral analysis to detect and prevent data exfiltration from a network. AutoFocus is integrated with Palo Alto Networks firewalls and other security products to provide a comprehensive security solution. AutoFocus can detect and prevent data exfiltration from a network by monitoring network traffic for suspicious activity and alerting administrators when a breach is detected."

NEW QUESTION: 16

Which Palo Alto Networks feature can be used to detect and prevent data exfiltration from a network?

- A. Data Loss Prevention
- B. Network Access Control
- C. Content Inspection
- D. XDR

Answer: C (LEAVE A REPLY)

PC CET can be used to detect and prevent data exfiltration from a network. DumpTop is a tool that can be used to detect and prevent data exfiltration from a network. PC CET can be used to detect and prevent data exfiltration from a network. DumpTop is a tool that can be used to detect and prevent data exfiltration from a network. PC CET can be used to detect and prevent data exfiltration from a network. DumpTop is a tool that can be used to detect and prevent data exfiltration from a network.

 □□ □□□ □□ □□□ □□□□□?

- A.** □□□, □□□□ □ □□ □□
B. □□□□□ □□
C. □□ □□□
D. □□□ □□

Answer: A (LEAVE A REPLY)

Cloud computing is a model of computing where resources are provided as a service over the Internet. SaaS (Software as a Service) is a type of cloud computing where software applications are hosted by a third party and accessed by users over the Internet. Other types of cloud computing include IaaS (Infrastructure as a Service) and PaaS (Platform as a Service). Cloud computing offers many benefits, including scalability, flexibility, and cost savings. It also has some risks, such as security and data privacy concerns. Cloud computing is becoming increasingly popular as more businesses and individuals move their operations to the cloud.

IAM(Identity and Access Management) □□ □□□ □□□ □□□ □□□□□□.

Answer:

NEW QUESTION: 56

Which Palo Alto Networks Cortex XSOAR use case is NOT supported?

Palo Alto Networks Cortex XSOAR is used for:

- A. Cortex XSOAR
- B. Cortex XDR
- C. Cortex XSIEM
- D. Cortex XDR

Answer: A (LEAVE A REPLY)

SOAR

SOAR (Security Orchestration, Automation, and Response) is a type of security tool that helps organizations respond to security incidents more quickly and effectively. It is used for automating security tasks, such as incident response, threat hunting, and vulnerability management. SOAR can also be used for automating security operations, such as log analysis, threat intelligence, and incident response.

NEW QUESTION: 57

Which Palo Alto Networks Cortex XSOAR use case is NOT supported?

- A. ☐
- B. A
- C. C
- D. ☐

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 58

IAM(Identity and Access Management) ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐.

IAM security		Ensuring least-privileged access to cloud resources and infrastructure
Machine Identity		Discovering threats by identifying activity that deviates from a normal baseline
User Entity Behavior Analytics		Securing and managing the relationships between users and cloud resources
Access Management		Decoupling workload identity from IP addresses

Answer:

IAM security	IAM security	Ensuring least-privileged access to cloud resources and infrastructure
Machine Identity	User Entity Behavior Analytics	Discovering threats by identifying activity that deviates from a normal baseline
User Entity Behavior Analytics	Access Management	Securing and managing the relationships between users and cloud resources
Access Management	Machine Identity	Decoupling workload identity from IP addresses
IAM security	IAM security	Ensuring least-privileged access to cloud resources and infrastructure
Machine Identity	User Entity Behavior Analytics	Discovering threats by identifying activity that deviates from a normal baseline
User Entity Behavior Analytics	Access Management	Securing and managing the relationships between users and cloud resources
Access Management	Machine Identity	Decoupling workload identity from IP addresses

NEW QUESTION: 59

Which of the following is a valid path for a file in the /etc directory? (Choose two.)

- A. /etc/passwd
- B. /etc/shadow
- C. /etc/passwd
