NEW QUESTION: 11

Which of the following is a common indicator of a security incident? (Select all that apply.)

- A. Unusual network traffic patterns.
- B. Unexpected system restarts.
- C. Unauthorized access to sensitive data.
- D. Malware detection on endpoints.

Answer: (SHOW ANSWER)

Correct Answer: A, C, D. Unusual network traffic patterns, unauthorized access to sensitive data, and malware detection on endpoints are common indicators of a security incident. Unexpected system restarts could be a symptom of a security incident but is not a common indicator. (Source: XSIAM Analyst ILT Lab Guide.pdf, 37 (XSIAM Analyst ILT Lab Guide))

NEW QUESTION: 62

Which of the following is a common XDR use case?

- A. XDR is used to monitor network traffic.
- B. XDR is used to monitor endpoint activity.
- C. XDR is used to monitor cloud activity.
- D. XDR is used to monitor user activity.

Answer: ([SHOW ANSWER](#))

Answer: B - XDR is used to monitor endpoint activity.

Cortex XSIAM is a cloud-native XDR solution that provides comprehensive visibility into endpoint, network, and cloud activity. It uses a centralized data lake to store and analyze data from various sources, including endpoints, networks, and cloud services. Cortex XSIAM also provides advanced threat detection and response capabilities, including automated incident response and threat hunting. Cortex XSIAM is designed to be scalable and easy to integrate with existing security tools and processes.
