**Answer: B (LEAVE A REPLY)**

SAP Service Cloud Version 2 is a cloud-based customer service platform that allows businesses to manage their customer interactions across multiple channels. It provides a unified view of the customer and enables agents to resolve issues quickly and efficiently. The platform is built on SAP's cloud infrastructure and offers a range of features and integrations. It is designed to be easy to use and integrate with existing systems. The platform is available as a SaaS solution and is scalable to meet the needs of businesses of all sizes. It is a powerful tool for improving customer service and increasing customer loyalty.

SDK is a software development kit that allows developers to create custom applications for SAP Service Cloud. It provides a set of APIs and tools that can be used to build integrations with other systems and to create custom workflows. The SDK is designed to be easy to use and integrate with existing systems. It is a powerful tool for extending the functionality of SAP Service Cloud and for creating custom solutions for specific business needs.

SAP Service Cloud is a cloud-based customer service platform that allows businesses to manage their customer interactions across multiple channels.
