NEW QUESTION: 7

Which of the following is a benefit of using Education Data Architecture (EDA) to integrate Person Accounts with Salesforce Marketing Cloud?
A. EDA allows you to create a single view of a customer across all Salesforce products.
B. EDA allows you to create a single view of a customer across all Salesforce products, including Person Accounts.
C. EDA allows you to create a single view of a customer across all Salesforce products, including Person Accounts, but not Education Cloud.

- A. EDA allows you to create a single view of a customer across all Salesforce products.
- B. EDA allows you to create a single view of a customer across all Salesforce products, including Person Accounts.
- C. EDA allows you to create a single view of a customer across all Salesforce products, including Person Accounts, but not Education Cloud.

Answer: A (LEAVE A REPLY)

Education Cloud, which includes Education Data Architecture (EDA), allows you to create a single view of a customer across all Salesforce products, including Person Accounts. EDA allows you to create a single view of a customer across all Salesforce products, including Person Accounts, but not Education Cloud. EDA allows you to create a single view of a customer across all Salesforce products, including Person Accounts, but not Education Cloud.

NEW QUESTION: 8

Which of the following is a benefit of using Einstein Bots to integrate SMS with Salesforce Marketing Cloud?
A. Einstein Bots allows you to create a single view of a customer across all Salesforce products.
B. Einstein Bots allows you to create a single view of a customer across all Salesforce products, including Person Accounts.
C. Einstein Bots allows you to create a single view of a customer across all Salesforce products, including Person Accounts, but not Education Cloud.

- A. Einstein Bots allows you to create a single view of a customer across all Salesforce products.
- B. Einstein Bots allows you to create a single view of a customer across all Salesforce products, including Person Accounts.
- C. Einstein Bots allows you to create a single view of a customer across all Salesforce products, including Person Accounts, but not Education Cloud.

Answer: (SHOW ANSWER)

Einstein Bots SMS, which includes Einstein Bots, allows you to create a single view of a customer across all Salesforce products, including Person Accounts. Einstein Bots allows you to create a single view of a customer across all Salesforce products, including Person Accounts, but not Education Cloud. Einstein Bots allows you to create a single view of a customer across all Salesforce products, including Person Accounts, but not Education Cloud.

NEW QUESTION: 9

Which of the following is a benefit of using Student Success Hub to integrate with Salesforce Marketing Cloud?
A. Student Success Hub allows you to create a single view of a customer across all Salesforce products.
B. Student Success Hub allows you to create a single view of a customer across all Salesforce products, including Person Accounts.
C. Student Success Hub allows you to create a single view of a customer across all Salesforce products, including Person Accounts, but not Education Cloud.
D. Student Success Hub allows you to create a single view of a customer across all Salesforce products, including Person Accounts, but not Education Cloud and Einstein Bots.

- A. Student Success Hub allows you to create a single view of a customer across all Salesforce products.
- B. Student Success Hub allows you to create a single view of a customer across all Salesforce products, including Person Accounts.
- C. Student Success Hub allows you to create a single view of a customer across all Salesforce products, including Person Accounts, but not Education Cloud.
- D. Student Success Hub allows you to create a single view of a customer across all Salesforce products, including Person Accounts, but not Education Cloud and Einstein Bots.

Answer: (SHOW ANSWER)

Student Success Hub is a cloud-based solution that helps students and parents stay connected and informed. It provides a central location for students to access their course materials, grades, and schedules. Parents can use the platform to monitor their child's progress and communicate with teachers. Student Success Hub also offers a variety of resources, including video lessons, interactive activities, and personalized learning plans. The platform is designed to be user-friendly and accessible from any device, making it easy for students and parents to use. For more information, visit <https://www.salesforce.org/products/student-success-hub/overview/>, <https://powerofus.force.com/s/article/SSHUB-Student-Cases>, or <https://powerofus.force.com/s/article/EDA-Accounts>.

NEW QUESTION: 10

Which of the following is a key benefit of using Salesforce for IT? A. It provides a central location for all IT data. B. It allows for easy integration with other systems. C. It provides a secure and scalable environment for IT data.

A. It provides a central location for all IT data.

B. It allows for easy integration with other systems.

C. It provides a secure and scalable environment for IT data.

Answer: A ([LEAVE A REPLY](#))

IT is a critical part of any organization's success, and Salesforce provides a powerful platform for managing IT data. One of the key benefits of using Salesforce for IT is that it provides a central location for all IT data, making it easy to access and manage. Additionally, Salesforce allows for easy integration with other systems, ensuring that all IT data is synchronized and up-to-date. Finally, Salesforce provides a secure and scalable environment for IT data, ensuring that your organization's data is always protected and available when you need it.

NEW QUESTION: 14

Which of the following Salesforce features is used to manage user permissions and access to data?

 A. Profiles

 B. Roles

 C. Permission Sets

- A. Profiles
- B. Roles
- C. Permission Sets

Answer: A (LEAVE A REPLY)

Which of the following Salesforce features is used to manage user permissions and access to data?

 Education Data Architecture (EDA) is a Salesforce solution that provides a secure and scalable way to manage and analyze educational data. EDA is designed to help schools and universities improve their operations and outcomes. EDA is built on the Salesforce platform and integrates with various data sources. EDA provides a central repository for educational data, which can be accessed and analyzed by authorized users. EDA also provides tools for data management, reporting, and analytics. EDA is a powerful tool for educational institutions that want to improve their data management and analysis capabilities.

NEW QUESTION: 19

Which of the following is a feature of Admissions Connect?

- A. Open Date and Due Date fields
- B. Custom Open Date and Due Date fields
- C. ApplicantCommunityHomePageController Apex class

Answer: B (LEAVE A REPLY)

The consultant should leverage the Open Date and Due Date fields to meet the requirement of making sure applications are unable to be edited after the submission deadline for the Admissions office that is using Admissions Connect to manage its student application review process. The Open Date and Due Date fields are fields on the Application object in Admissions Connect that allow users to specify when an application is open or closed for submission. The Open Date field indicates the date and time when an application can be submitted by an applicant. The Due Date field indicates the date and time when an application can no longer be submitted by an applicant. The consultant can leverage the Open Date and Due Date fields to meet the requirement of making sure applications are unable to be edited after the submission deadline for the Admissions office that is using Admissions Connect to manage its student application review process by configuring and customizing these fields to match their application deadlines and policies. Creating custom Open Date and Due Date fields, developing a custom trigger that checks the submission deadline against the current date, or activating the ApplicantCommunityHomePageController Apex class are not functionalities that the consultant should use to meet the requirement of making sure applications are unable to be edited after the submission deadline for the Admissions office that is using Admissions Connect to manage its student application review process. Answer: (SHOW ANSWER)

NEW QUESTION: 25

Which of the following is a Salesforce feature that allows users to create and manage data flows between Salesforce and other systems? A. MuleSoft Anypoint B. Data Loader C. Table-Driven Trigger Management D. Salesforce Connect

- A. MuleSoft Anypoint
- B. Data Loader
- C. Table-Driven Trigger Management
- D. Salesforce Connect

Answer: B (LEAVE A REPLY)

EDAs are used to integrate Salesforce with other systems. They are used to create data flows between Salesforce and other systems. The correct answer is B. Data Loader. Data Loader is used to create data flows between Salesforce and other systems.

- 1: MuleSoft Anypoint - Salesforce1
- 2: EDA - Salesforce4

NEW QUESTION: 28

Which of the following is a key benefit of using Education Data Architecture (EDA) and Salesforce Table-Driven Trigger Management (TDTM) together?
 A. EDA and TDTM allow you to create custom triggers for all objects in your org.
 B. EDA and TDTM allow you to create custom triggers for all objects in your org.
 C. EDA and TDTM allow you to create custom triggers for all objects in your org.

- A. EDA and TDTM allow you to create custom triggers for all objects in your org.
- B. EDA and TDTM allow you to create custom triggers for all objects in your org.
- C. EDA and TDTM allow you to create custom triggers for all objects in your org.

Answer: A (LEAVE A REPLY)

00

Education Data Architecture (EDA) and Salesforce Table-Driven Trigger Management (TDTM) are two powerful tools that can be used together to create custom triggers for all objects in your org. EDA allows you to create custom triggers for all objects in your org. TDTM allows you to create custom triggers for all objects in your org. EDA and TDTM allow you to create custom triggers for all objects in your org.

EDA and TDTM allow you to create custom triggers for all objects in your org. EDA and TDTM allow you to create custom triggers for all objects in your org. EDA and TDTM allow you to create custom triggers for all objects in your org. EDA and TDTM allow you to create custom triggers for all objects in your org.

NEW QUESTION: 31

An Advancement office is evaluating the automation capabilities of the Education Data Architecture (EDA).

The office needs to be able to identify inactive addresses and have them sync to the contact record.

How should the consultant meet this requirement?

- A. Set the inactive address on the Contact record through integration.
- B. Select the "Inactive" checkbox on the Address record.
- C. Develop a custom trigger to update the Contact record.

Answer: B (LEAVE A REPLY)

Explanation

The Education Data Architecture (EDA) provides a feature to track and manage multiple addresses for contacts and accounts using the Address object¹. The Address object has a field called "Inactive" that indicates whether the address is currently in use or not². By selecting the "Inactive" checkbox on the Address record, the consultant can mark the address as inactive and have it sync to the contact record. The contact record will then show the inactive address in the Mailing Address field, with a strike-through line to indicate that it is no longer valid³.

- A. Create a custom Report Type with Courses, Course Offerings, and Course Connections.
- B. Use the Course Connections with Contact's Academic Program Report Type.
- C. Add a Course Connections cross filter to the Program Enrollments with Contact report.

Answer: A (LEAVE A REPLY)

Explanation

EDAs in Salesforce are used to create reports. To create a report, you need to select the report type, the columns, and the filters. In this case, the report type is 'Course Connections with Contact's Academic Program Report Type'. The columns are 'Courses, Course Offerings, Course Connections', 'Contact', and 'Course'. The filters are 'Course Offering', 'Course Connection', and 'Contact'. The report is then run to generate the data.

NEW QUESTION: 52

A large university integrates over one million student Contact records from its Student Information System (SIS)

The university has adopted the Education Data Architecture (EDA) Administrative account

Records in Salesforce is Integration User.

What should the consultant discuss with the university?

- A. API call limits
- B. Ownership data skew
- C. Account data skew
- D. OAuth token limits

Answer: (SHOW ANSWER)

Ownership data skew is what the consultant should discuss with the university, because it is a potential performance issue that can occur when a large number of records are owned by a single user. In this case, the Integration User owns over one million Contact records, which can cause slow or failed queries, reports, or list views. The consultant should advise the university to distribute the ownership of the records among multiple users or queues to avoid ownership data skew. API call limits, account data skew, and OAuth token limits are not relevant to this scenario. Reference:

- D. Video

Answer: B (LEAVE A REPLY)

NEW QUESTION: 68

Which of the following is a feature of the RACI matrix?

- A. It is used to define roles and responsibilities.
- B. It is used to track project progress.
- C. It is used to identify project risks.
- D. It is used to allocate resources.

Answer: (SHOW ANSWER)

The RACI matrix is a project management tool used to define roles and responsibilities for each task in a project. It is a grid with tasks on the vertical axis and team members on the horizontal axis. The letters R, A, C, and I represent different roles: R (Responsible), A (Accountable), C (Consulted), and I (Informed). The matrix helps to ensure that everyone knows what they are responsible for and who they need to consult or inform during the project.

NEW QUESTION: 69

Which of the following is a feature of the Education Cloud? (Select two)

- A. Service Cloud
- B. Sales Cloud
- C. Education Cloud
- D. Slack

Answer: C (LEAVE A REPLY)

Service Cloud is a customer service solution that provides a unified view of customer interactions across all channels. It includes features like case management, knowledge base, and chat. Slack is a collaboration tool that allows teams to communicate and work together in real-time.

Education Cloud is a solution that provides a unified view of student interactions across all channels. It includes features like student success hub, learning analytics, and digital content. Sales Cloud is a sales management solution that provides a unified view of sales opportunities across all channels.

Center of Excellence

Center of Excellence is a team of experts who provide guidance and support to other teams in the organization. They are responsible for identifying best practices, developing standards, and providing training and support. In the context of Education Cloud, the Center of Excellence would be responsible for providing guidance and support to other teams in the organization.

Which of the following is a valid use case for WhatsApp in Service Cloud? (Select two.)

H. Send emojis to mobile devices.

I. Send GIFs to mobile devices.

J. Send stickers to mobile devices.

K. Send push notifications to mobile devices.

NEW QUESTION: 71

The Undergraduate Advising department plans to implement Student Success Hub and Pathways in a new org.

The system admin wants to use the recommended setup for external users.

Which security setting should the consultant configure?

A. Create an Account sharing rule to provide Read access based on record type.

B. Create a Program Plan sharing rule to provide Read access based on record type.

C. Change the default Program Plan sharing setting to Private.

D. Change the default Account sharing setting to Private.

E. Change the default Program Plan sharing setting to Public Read Only.

F. Change the default Account sharing setting to Public Read Only.

G. Change the default Program Plan sharing setting to Public Read Only.

Explanation

The consultant should configure a security setting to create a Program Plan sharing rule to provide Read access based on record type for the system admin who wants to use the recommended setup for external users when implementing Student Success Hub and Pathways in a new org for the Undergraduate Advising department. A sharing rule is a security setting that allows users to extend sharing access to users in public groups, roles, or territories. A Program Plan sharing rule can help the system admin provide Read access to external users based on record type by granting access to specific Program Plan records that are relevant or appropriate for external users, such as students or advisors. Creating an Account sharing rule to provide Read access based on record type, changing the default Program Plan sharing setting to Private, or creating a custom Permission Set for external users are not security settings that the consultant should configure for the system admin who wants to use the recommended setup for external users when implementing Student Success Hub and Pathways in a new org for the Undergraduate Advising department. NEW QUESTION: 84

Which of the following is a valid Education Data Architecture (EDA) object? Select two.

1. EDA Program Enrollment

- A. Program Enrollment
- B. Program Enrollment
- C. Program Enrollment
- D. Program Enrollment

Answer: D (LEAVE A REPLY)

1.

Course Offering is an EDA object that indicates a class is available for a given term. Course Offering is an object that represents a specific instance of a course that is offered during a term. Course Offering can be used to track various information about a class, such as name, code, capacity, faculty, location, or schedule. The consultant can create a Course Offering record for each class that is available for a given term and associate it with the Term object. Course Connection, Attendance Event, and Time Block are not EDA objects that indicate a class is available for a given term. References:

NEW QUESTION: 93

Recruiters want to visualize the number of prospective students at various stages in the recruitment process.

Which report chart should the consultant implement?

A. Application Tabular report

B. Education History dashboard

C. Program Enrollment dashboard

D. Opportunity Funnel report

Answer: D (LEAVE A REPLY)

Explanation

Opportunity Funnel report is a report chart that the consultant can implement to help recruiters visualize the number of prospective students at various stages in the recruitment process. Opportunity Funnel report is a type of report that shows the distribution of Opportunities by stage, amount, or probability. Opportunity Funnel report can be used to track the progress and performance of the recruitment pipeline, and identify bottlenecks or opportunities for improvement. Application Tabular report, Education History dashboard, and Program Enrollment dashboard are not report charts that can help recruiters visualize the number of prospective students at various stages in the recruitment process. Which of the following is a social media marketing tool? Select two correct answers.

- A. Studio
- B. Social Studio
- C. Email Studio
- D. Audience Studio

Answer: (SHOW ANSWER)

Social Studio is a social media marketing tool that helps you create, schedule, and analyze social media content. It integrates with popular social media platforms like Instagram, Twitter, and Facebook. Social Studio also provides analytics to track the performance of your social media campaigns. Email Studio, Audience Studio, and Interaction Studio are other tools in the Salesforce Marketing Cloud suite.

NEW QUESTION: 144

Education Data Architecture Salesforce Education Data Architecture. Which configuration should the consultant retain during the data import?

- A. Workflow rules
B. Sharing rules
C. Role hierarchy
D. Picklist values

Answer: C (LEAVE A REPLY)

NEW QUESTION: 145

A consultant is considering disabling certain configurations to optimize the data import of a large volume of student records into a university's Salesforce environment with the Education Data.

Which configuration should the consultant retain during the data import?

- A. Workflow rules
B. Sharing rules
C. Role hierarchy

Answer: B (LEAVE A REPLY)

The consultant should retain sharing rules during the data import because they control the access and visibility of records based on criteria such as record ownership, role hierarchy, or field values. Disabling sharing rules may cause data security or privacy issues. Workflow rules and role hierarchy are configurations that can be disabled during the data import to improve performance and avoid errors or conflicts. Reference:

https://help.salesforce.com/s/articleView?id=sf.data_loader_disable_triggers_workflow.htm&type=5
https://help.salesforce.com/s/articleView?id=sf.data_loader_sharing_rules.htm&type=5

NEW QUESTION: 146

A consultant is working with a university in Spain that will be using the Education Data Architecture (EDA).

Which of these considerations about translating EDA into Spanish should the consultant discuss with the university?

- A. EDA picklist values are restricted to the organization's default language.
B. EDA picklist values for reciprocal Relationships need to be translated manually.
C. Spanish is a platform-only language in EDA.

Answer: B (LEAVE A REPLY)

Explanation

EDA picklist values are restricted to the organization's default language. EDA picklist values for reciprocal Relationships need to be translated manually. Spanish is a platform-only language in EDA. EDA picklist values are restricted to the organization's default language. EDA picklist values for reciprocal Relationships need to be translated manually. Spanish is a platform-only language in EDA. EDA picklist values are restricted to the organization's default language. EDA picklist values for reciprocal Relationships need to be translated manually. Spanish is a platform-only language in EDA.

- B. Elevate and Giving Pages
- C. Gift Entry Manager
- D. Event Monitoring

Answer: (SHOW ANSWER)

An app on the AppExchange is a solution that the consultant can recommend to extend the Salesforce environment to support event management functionality. The AppExchange is a marketplace where customers can find apps that provide additional features and solutions for Salesforce. There are many apps on the AppExchange that offer event management capabilities, such as registration pages, ticketing, and agenda-building. The consultant can help the Advancement department choose an app that meets their needs and budget. Elevate and Giving Pages, Gift Entry Manager, and Event Monitoring are not solutions that can provide event management functionality. Reference:

NEW QUESTION: 159

An Advancement office wants a declaratively configured, public-facing form that creates data in Salesforce.

Which solution should the consultant recommend to meet the requirement?

A. An app on the AppExchange

B. Process Builder

C. Email-to-case

Answer: (SHOW ANSWER)

Explanation

The consultant should recommend an app on the AppExchange to create a declaratively configured, public-facing form that creates data in Salesforce, such as FormAssembly or Formstack, which are web form builders that integrate with Salesforce.

Process Builder is a tool that automates business processes based on certain criteria or actions, not a form builder. Email-to-case is a feature that converts emails from customers into cases in Salesforce, not a form builder. References:

NEW QUESTION: 166

The Recruitment and Admissions office wants to use Salesforce to track prospective students, recruitment events, student applications, digital engagement, and interactions with prospects on their mobile devices. Prospective students communicate via SMS on their mobile devices, social media, and email.

Which solution should the consultant recommend?

- A. Third-party app
- B. Salesforce Maps
- C. Einstein Bots

Answer: (SHOW ANSWER)

The best solution for the Recruitment and Admissions office to use Salesforce to track prospective students, recruitment events, student applications, digital engagement, and interactions with prospects on their mobile devices is C. Einstein Bots¹². Einstein Bots are chatbots that use artificial intelligence (AI) to automate conversations with prospective students on various channels, such as SMS, social media, and email. They can provide information, answer questions, collect data, and hand off the conversation to a human agent if needed. Einstein Bots can help the Recruitment and Admissions office to track digital engagement and interactions with prospects on their mobile devices, and improve the student experience¹².

A third-party app is not a Salesforce solution and may not be compatible with the Salesforce platform or the Education Data Architecture (EDA) that the Recruitment and Admissions office uses. Salesforce Maps is a location intelligence solution that helps sales and service teams optimize their territories, routes, and schedules³. It is not directly relevant to the scenario described in the question.

NEW QUESTION: 197

Which of the following is a valid use case for the Education Cloud Consultant role?

- A. Integration with external systems
- B. Integration with external systems
- C. Integration with external systems

Answer: A (LEAVE A REPLY)

The Education Cloud Consultant role is responsible for implementing and managing the Education Cloud solution. This includes configuring the system to meet the needs of the client, as well as providing training and support to the client's users. The role also involves working with the client's IT team to ensure that the system is integrated with their existing systems. The Education Cloud Consultant role is a key position in the Education Cloud implementation team.

NEW QUESTION: 199

Which two options should the consultant recommend to meet the requirement?
Choose 2 answers.

Which two options should the consultant recommend to meet the requirement?

- A. Knowledge
- B. Queues
- C. Bots
- D. Live Chat

Answer: (SHOW ANSWER)

NEW QUESTION: 200

The Registrar's office has limited staff and is interested in a real-time automated Salesforce messaging solution that can address common student questions on deadlines and requirements, and provide links to resources.

Which two options should the consultant recommend to meet the requirement?

Choose 2 answers.

- A. Knowledge
- B. Queues
- C. Bots
- D. Live Chat

Answer: C,D (LEAVE A REPLY)

Bots and Live Chat are two options that the consultant can recommend to meet the requirement of providing real-time automated Salesforce messaging solution that can address common student questions on deadlines and requirements, and provide links to resources. Bots are automated agents that can interact with customers via text or voice, and provide answers, guidance, or actions based on predefined rules or artificial intelligence. Live Chat is a feature that allows users to chat with customers or prospects in real time from a website or an app, and provide support or information. Bots and Live Chat can be used together to create a seamless customer service experience, where bots can handle simple inquiries and escalate complex cases to live agents. Knowledge and Queues are not options that can provide real-time automated Salesforce messaging solution. Reference:
