**NEW QUESTION: 10**

UC(Universal Container) is a container engine that runs on top of the operating system. It provides a lightweight and secure environment for running applications. UC is designed to be easy to use and manage, and it supports a wide range of operating systems and architectures. UC is a good choice for running applications that require high performance and security.

Which of the following is NOT a benefit of UC?

- A. It is easy to use and manage.
- B. It supports a wide range of operating systems and architectures.
- C. It provides a lightweight and secure environment for running applications.
- D. It is designed to be easy to use and manage.

Answer: (SHOW ANSWER)

**NEW QUESTION: 11**

UC(Universal Containers) is a container engine that runs on top of the operating system. It provides a lightweight and secure environment for running applications. UC is designed to be easy to use and manage, and it supports a wide range of operating systems and architectures. UC is a good choice for running applications that require high performance and security.

- A. It is easy to use and manage, it supports a wide range of operating systems and architectures, it provides a lightweight and secure environment for running applications.
- B. It is easy to use and manage, it supports a wide range of operating systems and architectures, it is designed to be easy to use and manage.
- C. It is easy to use and manage, it supports a wide range of operating systems and architectures, it is designed to be easy to use and manage.
- D. It is easy to use and manage, it supports a wide range of operating systems and architectures, it is designed to be easy to use and manage.
