Answer: ([SHOW ANSWER](#))

□□ □□ □ □□ □□.

we've boiled down the upgrade options into three simple paths to success, depending on each organization's unique situation. Many existing Sales and Service Cloud instances don't have extensive customizations or technical debt. In those cases, upgrading to Health Cloud in the current org frequently provides the fastest path with little to no disruption for existing users.

Answer: A,D ([LEAVE A REPLY](#))

_____.

Calculate Referral Scores

Calculate referral scores with a batch Apex job.

Referral scores are based on the Total Referrals and Converted Referrals fields on the referring practitioner's contact record. The calculated score appears in the Referrer Score field.

Use the scheduled job class name: `HcReferrerScoreScheduledJob`. To invoke Apex classes to run at specific times, first implement the `Schedulable` interface for the class. Then, schedule an instance of the class to run at a specific time using the `System.schedule` method.

 **Example:** To run the `HcCMSRiskScoringScheduledJob` class once, select **Debug | Open Execute Anonymous Window**. Enter the following text in the Enter Apex Code window in Developer Console.

```
// scheduled job sample
int batchSize = 200;
SchedulableContext sc = null;
HcReferrerScoreScheduledJob scheduledJob = new HcReferrerScoreScheduledJob(batchSize);
scheduledJob.execute(sc);
```

NEW QUESTION: 53

Which of the following is a valid Salesforce case record type? (Select three.)

- E. Case Summary

Answer: A,E (LEAVE A REPLY)

Case Report, Case History, Case Note.

Use Custom Fields to Run Provider Searches

In addition to the many standard fields in the Provider data model, you can also run searches for providers using custom fields based on your business needs. To use your custom fields with Provider Search, you can map them to custom fields in the Care Provider Searchable Field object.

- The custom fields must be in either the `HealthcareProvider` or `HealthcarePractitionerFacility` objects.
 - The custom fields must be of the type text, single-select picklist, or multi-select picklist.
1. From Object Manager, use Quick Find to find **Care Provider Searchable Field**.
 2. Create a text field to map to the custom field that you want to use in your searches.
Make a note of the API name you set for this new field.
 3. In Setup, use the Quick Find box to find **Care Provider Search Config**.
 4. Click **New Care Provider Search Config**.

Use the Health Cloud - Admin App

The Health Cloud - Admin app includes a set of tabs where you can customize Health Cloud features to support the ways your organization works with patients or members.

To use the Health Cloud - Admin app in Lightning Experience, go to App Launcher and select **Health Cloud - Lightning Admin**. To use the Health Cloud - Admin app in Salesforce Classic, use the app picker to select **Health Cloud - Admin**.

Administer Health Cloud

Customize the Health Cloud Cons

Cross Object Relationships
Cross-object relationships control which objects and fields appear in the filter selection options when creating patient or member lists.

EHR Custom Objects
These tables (EHR Patients, EHR Encounters, and so on) contain data from the source record system related to things like prescriptions, conditions, patients, and immunizations.

Patient Card Configurations
Edit the patient card view and add or remove information from EHR or other records.

Timeline View Configurations
Add or remove healthcare events from the timeline so that care coordinators have the information they need and can effectively manage patients or members.

Set Up Your Action Plan Templates

four users can use the action plan templates you define to create different types of visits. An action plan template adds a set of assessment tasks to a visit that your sales rep completes before ending the visit.

Before you create an action plan template, make sure you have the business flows that your sales reps need for their assessment tasks. You can either build your own flows using the Flow Builder, or you can use the Patient Registration and Order Authorization flows provided with Intelligent Sales. If you create a flow, make sure that this flow accepts VisitId and AssessmentTaskId as input.

2. Add task flows in an action plan template and publish it.

- a. In the Items tab of your action plan template, click **Add Flow**.

Warning: Only add task flows to your template. Intelligent Sales doesn't support assessment task definitions.

Consent can take place with the participant providing consent in person, using a tablet or mobile device. Patients and members who aren't physically present can log into their Experience Cloud site, then view and provide consent for documents related to the program.
