SAFe House of Lean is a framework for implementing Lean principles in an Agile environment. Which of the following is NOT a component of the SAFe House of Lean?

- A. Lean Principles
- B. Agile Practices
- C. Business Outcomes
- D. Project Management

Answer: D ([LEAVE A REPLY](#))

The SAFe House of Lean is a framework for implementing Lean principles in an Agile environment. It is composed of four main components: Lean Principles, Agile Practices, Business Outcomes, and Project Management. The SAFe House of Lean is based on the Toyota Production System (TPS) and the Agile Manifesto. The SAFe House of Lean is a framework for implementing Lean principles in an Agile environment. It is composed of four main components: Lean Principles, Agile Practices, Business Outcomes, and Project Management. The SAFe House of Lean is based on the Toyota Production System (TPS) and the Agile Manifesto. The SAFe House of Lean is a framework for implementing Lean principles in an Agile environment. It is composed of four main components: Lean Principles, Agile Practices, Business Outcomes, and Project Management. The SAFe House of Lean is based on the Toyota Production System (TPS) and the Agile Manifesto.

**NEW QUESTION: 75**

Which of the following is a key benefit of Agile project management?

- A. ART (Agile Release Train) provides a structured approach to Agile project management.
- B. SAFe (Scaled Agile Framework) is a framework for implementing Agile project management at scale.
- C. Scrum is a framework for implementing Agile project management.
- D. Kanban is a framework for implementing Agile project management.

Answer: C ([LEAVE A REPLY](#))

The Agile Release Train (ART) is a framework for implementing Agile project management. It is a structured approach to Agile project management that allows for the delivery of value in a predictable and consistent manner. The ART is based on the Scrum framework and the SAFe framework. The ART is a framework for implementing Agile project management. It is a structured approach to Agile project management that allows for the delivery of value in a predictable and consistent manner. The ART is based on the Scrum framework and the SAFe framework. The ART is a framework for implementing Agile project management. It is a structured approach to Agile project management that allows for the delivery of value in a predictable and consistent manner. The ART is based on the Scrum framework and the SAFe framework.

**NEW QUESTION: 79**

Enabler Stories are used to support the team's work. Which of the following is NOT a characteristic of an Enabler Story?

- A. They are not tracked in the team's backlog.
- B. They are not owned by the team.
- C. They are not used to estimate team capacity.
- D. They are not used to track team progress.

**Answer: A (LEAVE A REPLY)**

SAFe-for-Teams-SAFe-Practitioner-6-0

Enabler stories are used to support the team's work. They are not tracked in the team's backlog, they are not owned by the team, they are not used to estimate team capacity, and they are not used to track team progress. The correct answer is A. Enablers - Scaled Agile Framework, Enablers - Scaled Agile Framework, Enablers - Scaled Agile Framework, Enablers - Scaled Agile Framework.

**NEW QUESTION: 80**

Which of the following is NOT a characteristic of a Definition of Done (DoD)?

- A. It is a shared understanding of what it means to complete a work item.
- B. It is a list of criteria that must be met for a work item to be considered complete.
- C. It is a list of criteria that must be met for a work item to be considered ready for release.
- D. It is a list of criteria that must be met for a work item to be considered ready for deployment.

**Answer: (SHOW ANSWER)**

DoD(Definition of Done)

A Definition of Done (DoD) is a shared understanding of what it means to complete a work item. It is a list of criteria that must be met for a work item to be considered complete, ready for release, and ready for deployment. The correct answer is C. DoD is not a list of criteria that must be met for a work item to be considered ready for release. DoD is a list of criteria that must be met for a work item to be considered complete, ready for release, and ready for deployment.

**NEW QUESTION: 101**

Which of the following is a characteristic of emergent design?

- A. It is a linear process.
- B. It is a non-linear process.
- C. It is a sequential process.
- D. It is a parallel process.

Answer: (SHOW ANSWER)

AB

Emergent design is a non-linear, iterative process that evolves over time. It is characterized by its ability to adapt to changing requirements and its focus on collaboration and communication. Emergent design is often used in complex, multi-disciplinary projects where the requirements are not fully defined at the start. It is a process that allows for flexibility and creativity, and it is often used in conjunction with other design methods such as agile and lean. Emergent design is a process that allows for flexibility and creativity, and it is often used in conjunction with other design methods such as agile and lean. Emergent design is a process that allows for flexibility and creativity, and it is often used in conjunction with other design methods such as agile and lean.

**NEW QUESTION: 102**

Which of the following is a characteristic of the Scaled Agile Framework (SAFe)?

- A. It is a linear process.
- B. It is a non-linear process.
- C. It is a sequential process.
- D. It is a parallel process.

Answer: (SHOW ANSWER)

AB

SAFe is a framework for scaling agile practices across an organization. It is a process that allows for flexibility and creativity, and it is often used in conjunction with other design methods such as agile and lean. SAFe is a process that allows for flexibility and creativity, and it is often used in conjunction with other design methods such as agile and lean. SAFe is a process that allows for flexibility and creativity, and it is often used in conjunction with other design methods such as agile and lean.
