NEW QUESTION: 17

Which of the following is a characteristic of a Release on Demand (ROD) model?

- A. It is a one-time release.
- B. It is a continuous delivery pipeline.
- C. It is a batch release.
- D. It is a just-in-time release.

Answer: A (**LEAVE A REPLY**)

Release on Demand (ROD) is a software release model where software is released to production as soon as it is ready, without the need for a formal release process. This model is often used for small, frequent releases. Continuous Delivery Pipeline (CDP) is a software release model where software is released to production as soon as it is ready, without the need for a formal release process. This model is often used for large, infrequent releases. Batch release is a software release model where software is released to production in a single batch. Just-in-time release is a software release model where software is released to production as soon as it is ready, without the need for a formal release process. This model is often used for small, frequent releases.

Which of the following is a characteristic of a Release on Demand (ROD) model?

- * It is a one-time release.
- * It is a continuous delivery pipeline.
- * It is a batch release.
- * It is a just-in-time release.

NEW QUESTION: 18

ART PI is a framework for managing the release of software. It is based on the Scrum framework, but it is designed to be more flexible and scalable. DumpTop is a leading provider of ART PI training and consulting services. DumpTop offers a variety of ART PI training courses, including ART PI Fundamentals, ART PI Advanced, and ART PI Master. DumpTop also offers ART PI consulting services to help organizations implement ART PI successfully.

- A. It is a one-time release.
- B. It is a continuous delivery pipeline.
- C. It is a batch release.
- D. It is a just-in-time release.

Answer: D (**LEAVE A REPLY**)
