Answer: (SHOW ANSWER)

TOGAF ADM is a framework for developing and governing an enterprise architecture. It provides a structured approach to the development and maintenance of an organization's architecture. The framework is organized into four phases: Preliminary, Business Architecture, Information Systems Architectures, and Technology Architecture. The ADM process is iterative and continuous, allowing organizations to evolve their architecture over time. The framework is based on the TOGAF Architecture Change Management (ACM) process, which is defined in TOGAF 3.2.

NEW QUESTION: 18

TOGAF ADM is a framework for developing and governing an enterprise architecture. It provides a structured approach to the development and maintenance of an organization's architecture. The framework is organized into four phases: Preliminary, Business Architecture, Information Systems Architectures, and Technology Architecture. The ADM process is iterative and continuous, allowing organizations to evolve their architecture over time. The framework is based on the TOGAF Architecture Change Management (ACM) process, which is defined in TOGAF 3.2.

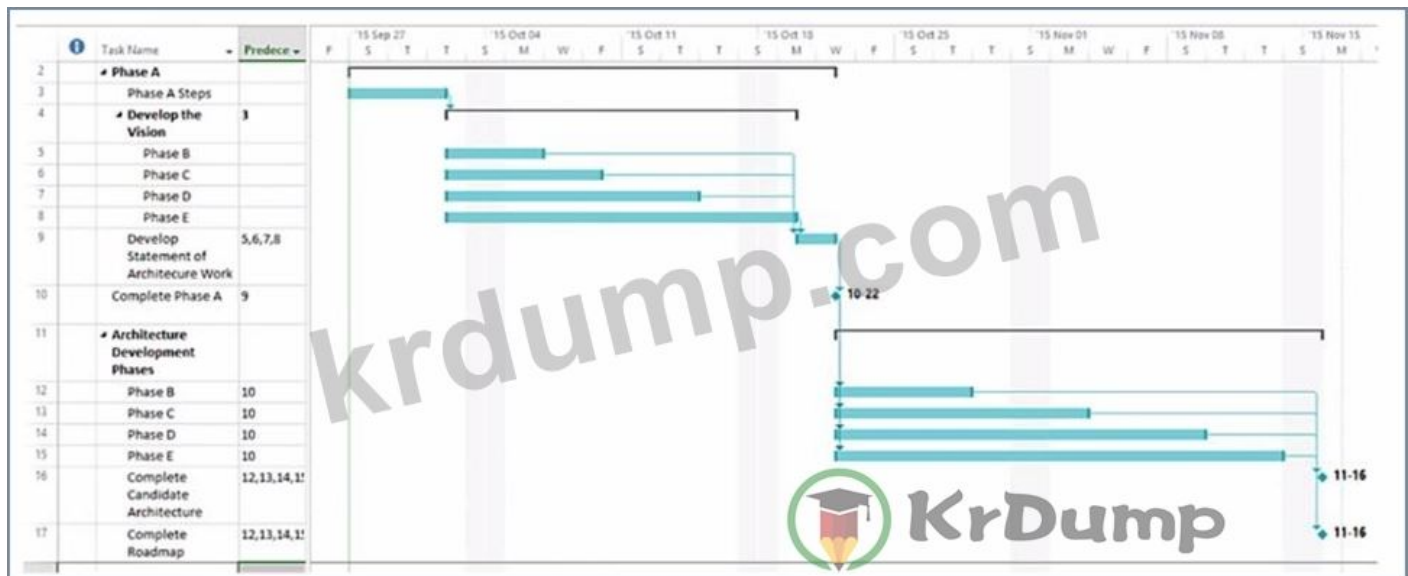

- A. Preliminary
