NEW QUESTION: 88

When you take a snapshot of a VM, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file.

When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file.

When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file.

When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file.

When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file.

- A. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file.
- B. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file.
- C. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file.
- D. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file.

Answer: (SHOW ANSWER)

When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. <https://docs.vmware.com/en/VMware-vSphere/8.0/vsphere-vm-administration/GUID-50BD0E64-75A6-4164-B0E3-A2FBCCE15F1A.html>

NEW QUESTION: 89

When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file.

When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file.

- A. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file.
- B. vCenter When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file. When you take a snapshot, the snapshot is stored in the VM's disk file.

NEW QUESTION: 91

Which ESXi command is used to check the status of the ESXi services? (Select two.)

Options: 39 (Select two)

- A. `servicescli`
- B. `esxcli system services list`
- C. `esxcli system services restart`
- D. `esxcli system services status`

Answer: A (LEAVE A REPLY)

Explanation: The `servicescli` command is used to check the status of the ESXi services. The `esxcli system services status` command is also used to check the status of the ESXi services.
